NOTES:

1. Change in groundwater surface elevation contours represent the difference between groundwater level measurements taken by the Department of Water Resources and Local Cooperators during March 2007 and August 2007
2. Groundwater elevations are based on national geodetic vertical datum 1988 (NGVD 88)
3. Groundwater contours are based on groundwater level measurements taken from wells constructed within the middle portion of the aquifer system (100 to 400 feet deep). This portion of the aquifer supplies approximately 70% of all domestic, agricultural and municipal wells.
4. Blue contour lines represent 10 foot intervals and yellow contour lines represent 5 foot intervals.
