

APPLICATION EVALUATION FORM

2014 Water-Energy Grant Program

FY 2014-2015

APPLICANT	California Native Plant Society	GRANT AMOUNT REQUESTED	\$433,563
PROPOSAL TITLE	The Real California Landscapes	TOTAL PROPOSAL COST	\$789,113

PROPOSAL DESCRIPTION

In order to retain stormwater, conserve water, reduce use of herbicides and fertilizer, and create urban pollinator habitat, this project will create two high-profile demonstration gardens, create a toolkit that CNPS chapters will use to convert large managed landscapes, and convert 50,000 sq. ft. of turf around a commercial firm in the Shadelands Business Park in Walnut Creek, CA

TECHNICAL REVIEW SUMMARY

Project is ineligible for funding. While an innovative project, the proposed funded activities are separate from the actual water savings activities. Therefore the tangible water savings activities would occur outside the grant.
