**TECHNICAL REVIEW SUMMARY**

<b>Subject</b>	<b>Attachment</b>	<b>Application Review Comments</b>
Calculation Review	Attachment 2	The Energy Intensity value was adjusted to 4,061 kWh/MG. The correction sums the Energy Intensity of potable water and the 35% prorated value for waste water. Some project elements do not belong to a water efficiency program. These project elements were removed from the savings calculation. As a result of all adjustments, the water savings per million dollars and the energy savings per million dollars decreased.
Agreement Components	Attachments 3, 4, and 5	Concur with agreement components and attachments meet the agreement component requirements, as outlined in the PSP.
DAC Benefit/Status	Attachment 7	Applicant does not claim DAC status
