

APPLICATION EVALUATION FORM
2014 Water-Energy Grant Program
FY 2014-2015

| | | | |
|-----------------------|---|-------------------------------|-------------|
| APPLICANT | The Energy Coalition | GRANT AMOUNT REQUESTED | \$2,432,450 |
| PROPOSAL TITLE | Energy and Water Savings in the Water/Wastewater Treatment Sector | TOTAL PROPOSAL COST | \$3,282,450 |

PROPOSAL DESCRIPTION

Assist water and wastewater agencies in California's disadvantaged communities with expedited project implementation support for energy optimization projects and water leak loss repairs utilizing the project delivery model of the Southern California Regional Energy Network. Direct equipment and process retrofits will assist water agencies to conserve energy and the identification and repair of distribution system leaks will conserve water.

TECHNICAL REVIEW SUMMARY

Project is ineligible for funding. While leak detection and repair is important, the project is structured such that the tangible water and energy savings activity occurs outside the scope of the grant.
