

# Project WET Workshop

## CLIMATE CHANGE and CALIFORNIA WATER

### Saturday Oct. 5, 2024

Join the California Department of Water Resources, Alameda County Water District and California Project WET for a special workshop on climate change and its impact on California's water resources.

Understanding climate change and its link to flood, drought, water quality, and more is crucial for all Californians. In this special workshop, you will learn activities to use with your students to help them understand the impacts of climate change on water and steps they can take to adapt to our changing environment.

Project WET activities are designed to engage students in the study of water through interactive simulations, use of models, and reality-based scenarios. The interdisciplinary activities supplement existing curriculum, are correlated to Common Core and Next Generation Science Standards, and provide strong foundations for STEAM, Project-Based, and Service-Learning programs.

Participants will receive a wealth of current information on climate science and its application, an opportunity to interact with experts from DWR and ACWD staff about climate resiliency, a copy of Project WET Guide 2.0, breakfast & lunch, an opportunity to receive 0.8 CEU credit - and a \$100 stipend following completion of the workshop!

**Saturday Oct. 5, 2024  
(8:00 am to 4:00 pm)**

Alameda County Water District  
43885 S Grimmer Blvd.  
Fremont, CA 94538

Registration is limited to the first 30 individuals to register. Additional registrants will be placed on a waiting list.

**Registration closes Friday,  
September 27, 2024**
