

Project WET Workshop CLIMATE CHANGE and CALIFORNIA WATER

Saturday, October 3, 2026
8am - 4pm

The Yurok Tribe, the California Department of Water Resources (DWR), and Water Education Foundation's California Project WET program invite educators working with students in grades 3 through 12 to join us for a special workshop on climate change, its impact on California's water resources, and innovative solutions and opportunities to help California adapt to a changing climate.

In this workshop, you will interact with DWR climate experts and engage in activities to help your students understand complex water topics and how they relate to water in their daily lives.

Project WET activities engage students through interactive simulations, use of models, and reality-based scenarios. The interdisciplinary activities supplement existing curriculum, are correlated to Common Core and Next Generation Science Standards, and provide strong foundations for STEAM, Project-Based, and Service-Learning programs.

For a \$25 registration fee, participants will receive a copy of the Project WET Foundations of Water Education guide, a continental breakfast and lunch, an opportunity to receive 0.8 CEU credit - and a \$120 stipend following completion of the workshop!

**Yurok Tribe Main Office
Klamath, CA
190 Klamath Blvd.,
Klamath, CA 95548**

Registration is limited to first 30 individuals to register. Additional registrants will be placed on a waiting list.
