

Greenhouse Gas Emissions Reduction Plan Consistency Determination For Projects Using Contractors or Other Outside Labor

This form is to be used by DWR Project Managers to document a CEQA project's consistency with the DWR Greenhouse Gas Emissions Reduction Plan (GGERP). This form is to be used only when DWR is the Lead Agency and when contractors or outside labor and equipment are used to implement the project.

Additional Guidance on filling out this form can be found at:
<https://cawater.sharepoint.com/teams/prog/icc/SitePages/ClimateActionPlan.aspx>

The DWR Greenhouse Gas Emissions Reduction Plan can be accessed at:
<https://water.ca.gov/-/media/DWR-Website/Web-Pages/Programs/All-Programs/Climate-Change-Program/Climate-Action-Plan/Files/CAP-I-GGERP-Update-2020.pdf>

Project Name:	Kopta Slough Multi-Benefit Project
Environmental Document Type:	Initial Study/Mitigated Negative Declaration
Project Manager's Name:	Adam Henderson
Project Manager's E-mail:	Adam.Henderson@water.ca.gov
Division:	Regional Assistance
Office, Branch, or Field Division:	Northern Region Office

Short Project Description:
The proposed project consists of rock revetment removal along the Sacramento River's right bank at the Kopta Slough Property (River Mile 220 to 221) to restore natural fluvial and floodplain processes; restoration of the agricultural portion of the Kopta Slough Property to establish native floodplain habitat; and transfer of ownership of the Kopta Slough Property to facilitate its long-term conservation and management, as well as facilitate the enhancement of public recreational opportunities.

Project Greenhouse Gas (GHG) Emissions Summary:		
Total Construction Emissions	1593.1	mtCO ₂ e
Maximum Annual Construction Emissions	1593.1	mtCO ₂ e (For construction lasting 12 months or less the total and maximum annual construction emissions will be the same)
<input type="checkbox"/> All other emissions from the project not accounted for above will occur as ongoing operational, maintenance, or business activity emissions and therefore have already been accounted for and analyzed in the GGERP.		

Extraordinary Construction Project Determination:
Do total project construction emissions exceed 25,000 mtCO ₂ e for the entire construction phase or exceed 12,500 mtCO ₂ e in any single year of construction?
<input checked="" type="checkbox"/> No – Additional analysis not required <input type="checkbox"/> Yes – Project specific emissions mitigation measures have been included in the environmental analysis document for the project

Project GHG Reduction Plan Checklist:

All Project Level GHG Emissions Reduction Measures have been incorporated into the design or implementation plan for the project. ([Project Level GHG Emissions Reduction Measures](#))

Or

All feasible Project Level GHG Emissions Reduction Measures have been incorporated into the design or implementation plan for the project and Measures not incorporated have been listed and determined not to apply to the proposed project (include as an attachment)

Project does not conflict with any of the Specific Action GHG Emissions Reduction Measures ([Specific Action GHG Emissions Reduction Measures](#))

Would implementation of the project result in additional energy demands on the SWP system of 15 GWh/yr or greater?

Yes No

If you answered Yes, attach a letter documenting that the project has consulted with the DWR SWP Power and Risk Office regarding the additional power requirements of the project.

Is there substantial evidence that the effects of the proposed project may be cumulatively considerable notwithstanding the proposed project's compliance with the requirements of the DWR GHG Reduction Plan?

Yes No

If you answered Yes, the project is not eligible for streamlined analysis of GHG emissions using the DWR GHG Emissions Reduction Plan. (See CEQA Guidelines, section 15183.5, subdivision (b)(2).)

Project Manager Signature: Adam Henderson Date: 6/20/2022

After the Project Manager has reviewed and signed above please use DocuSign to forward this form to the DWR Climate Change Program at ceqaclimatechange@water.ca.gov for final approval.

For DWR Climate Change Program Use Only:

Based on the information provided above and information provided in associated environmental documentation completed pursuant to the above referenced project, the DWR Climate Change Program has determined that:

- The entire proposed project is consistent with the DWR GGERP and the GHGs emitted by the project are covered by the plan's analysis.
- The operational and maintenance phase of the project is consistent with the DWR GGERP and the GHGs emitted by the project are covered by the plan's analysis. Emissions from the construction phase of the project are not covered by the DWR GGERP and will be mitigated as part of the project.

Climate Change Program Approval Signature: Jordi Vasquez Date: 6/20/2022
