Internship Program

DCA launched an internship program in summer of 2020, 2022 and again in 2023. The program provides college-level students hands-on learning experience about the planning process and design aspects of public infrastructure construction.

The interns gain valuable experience including the opportunity to apply concepts in communications, engineering and environmental review.

Delta Library Resources

Delta area public libraries are a continuous resource for the Delta community at large. Understanding the limits of broadband and computer access in the region, the DCA has provided area libraries with several DCA and DWR project-related resources in print and on flash drives. Librarians have been briefed on these resources and materials and can help

any visitor access information related to the proposed project. Library materials were updated in January and again in July 2022 once the Draft EIR was released.
