## Adapting to Climate Change: Catching and Moving Water from Big Storms

Climate change models indicate that precipitation will fall more as rain and less as snow. This creates more runoff and river flows in the winter. The Delta Conveyance Project—a water infrastructure modernization project—will help capture and move excess water and still meet fishery and water quality protections.

The chart below shows diversions made by the Central Valley Project and the State Water Project (SWP) from the Delta in the 2025 water year, beginning in October 2024. It also shows the theoretical diversions that could have been made to capture excess water by the Delta Conveyance Project.

### Diversions for Water Year 2025 (Estimates from October 1, 2024 through June 5, 2025)

-Assumes 6,000 cfs DCP diversion capacity

-Estimate based on available water above D-1641 requirements and allowable DCP diversion under the proposed bypass criteria

-Estimates are preliminary and subject to change

-The ITP for the Delta Conveyance Project includes regular risk assessments to consider monitoring data and potential effects to sensitive aquatic species. The water diverted could be more or less than this estimate depending on real-time fish presence and behavior and biological criteria.

### MISSED OPPORTUNITY

If the DCP was operational October 1, 2024 through June 5, 2025 we could have moved **956,000 acre-feet of water**

**956,000 acre-feet of water = enough water to supply:**

#### Limiting Factors Key

WQ: Water Quality (D1641)

E/I: Export to Inflow Ratio (D1641)

I/E: Export to Inflow Ratio (ITP)

NDOI: Net Delta Outflow Index (D1641)

NDOI\_X2: Net Delta Outflow Index for X2 (D1641)

NDOI\_44.5K: Net Delta Outflow Index (ITP)

WQ(Fall X2): Summer/Fall Action (BiOps and ITP)

Capacity: Available Facility Capacity

OMRI-5k: Old and Middle River Index (OMRI) of 5,000 cfs (BiOps and ITP)

OMRI-5k\_SR-3.5K: OMRI of 5,000 cfs (BiOps) with SWP Exports Restricted to OMRI of 3,500 cfs (ITP)

OMRI-2.0k: OMRI of 2,000 cfs (BiOps and ITP)

OMRI-2.5K: OMRI of 2,500 cfs

OMRI-3.5K: OMRI of 3,500 cfs (ITP)

OMRI-1.5K: OMRI of 1,500 cfs

OMRI-0.5K: OMRI of 500 cfs

FFA: First Flush Action (BiOps and ITP)

QWest 1.5K: 7d avg QWest above 1500 cfs

STF: Storm Flex (BiOps and ITP)
