

# DWR A&E Contracts Look Ahead Report

Last Updated: September 26, 2023

Division	RFQ Number	Estimated Advertisement	Estimated Contract Term	Description of Work	A&E Category/ Service Type	Estimated Contract Value
Division of Flood Management	10193795	Currently Advertising	5 years	The Contractor will provide on-call engineering, environmental, strategic, and operational planning, and management support services related to DWR flood management activities. Contractor will provide support services to flood management programs and will enhance DWR's capability to execute the programs and projects described in DFM's Strategic Plan (2021) including assisting DWR to update the CVFPP (2022) to meet aggressive programmatic and financial schedules mandated by California's Governor and legislation.	Flood Management Engineering, Planning, and Environmental Services	\$40,000,000 to \$50,000,000
Division of Engineering	10192125	4th Quarter, 2023	5 Years	The Contractor will provide architectural and landscape architectural services for building facilities projects involving various DWR owned or leased buildings and various SWP facilities in California, from Red Bluff to Lake Perris. The focus of the Contractor's work will be architectural services, especially tenant improvements. In addition, landscape architectural services may also be needed independently to support DWR building projects.	Architectural Services	\$2,000,000 to \$5,000,000
Division of Operations and Maintenance	10191137	4th Quarter, 2023	4+1+1	The Contractor will provide on-call, as needed, Construction Project Management Services (CPMS) in the areas of construction management and contract administration, inspection, and other CPMS related engineering and management services for the Fire Modernization Program at State Water Project (SWP) Facilities.	Construction Project Management Services	\$20,000,000 to \$40,000,000
Division of Flood Management	10194587	4th Quarter, 2023	7 Years	The Contractor will assist DWR by providing engineering, environmental, and support services to advance implementation of projects consistent with the Central Valley Flood Protection Plan and make timely and cost-effective statewide investments of State money to improve flood management systems throughout California, including improving floodplain functions and ecosystem habitat. Projects are implemented in partnership with United States Army Corps of Engineers (USACE) and local partners.	Flood Projects Engineering, Environmental, and Support Services	\$14,000,000 to \$24,000,000
