# Long Valley Groundwater Basin

- Groundwater Basin Number: 5-31
- County: Lake
- Surface Area: 2,600 acres (square miles)

## **Basin Boundaries and Hydrology**

Long Valley Groundwater Basin is located within a narrow elongated valley northeast of Clear Lake. The basin is bounded on most sides by the Franciscan Formation. A small portion of the southern boundary consists of Quaternary volcanic rocks. The valley is drained by Long Valley Creek which is tributary to North Fork Cache Creek. Groundwater is developed in Quaternary alluvium and, to a limited extent, Quaternary terrace deposits.

Annual precipitation ranges from 27- to 33-inches, increasing to the west.

### Hydrogeologic Information

Hydrogeologic information was not available for the following:

Water-Bearing Formations Groundwater Level Trends Groundwater Storage

### Groundwater Budget (Type B)

Estimates of groundwater extraction are based on a survey conducted by the California Department of Water Resources in 1995. The survey included landuse and sources of water. Estimates of groundwater extraction for agricultural and municipal/industrial uses are 760 and 23 acre-feet respectively. Deep percolation from applied water is estimated to be 210 acre-feet.

### Groundwater Quality

Hydrogeologic information was not available.

### **Well Characteristics**

Well yields (gal/min)				
	Wen yields (gawnin)			
Municipal/Irrigation	Range 40 – 100	Average: 63 (3 Well		
	-	Completion Reports)		
Total depths (ft)				
Domestic	Range: 30 – 215	Average: 99 (25 Well		
		Completion Reports)		
Municipal/Irrigation	Range 33 – 150	Average: 96 (7 Well		
	-	Completion Reports)		

### **Active Monitoring Data**

Agency	Parameter Groundwater levels	Number of wells /measurement frequency NKD
	Miscellaneous water quality	NKD
NKD – No known data		

### **Basin Management**

Groundwater management:	Lake County adopted a groundwater management ordinance in 1999.
Water agencies	
Public	County of Lake
Private	None
