

## **ATTACHMENT 2**

### **SIERRA CLUB FORM LETTERS**

## ATTACHMENT 2 SIERRA CLUB FORM LETTERS

The commenters listed in Table Att 2-1 submitted similarly worded letters expressing their concerns about the project. These comments are addressed in Master Response 28, "Form Letter Response - Sierra Club," in FEIR Part II.1.28. While the exact language of the letters sent by each of the individuals listed in Table Att 2-1 might not be identical, no additional substantive comments pertaining to the Proposed Project or adequacy of the DEIR were identified beyond the issues already raised in the standard language.

Letters received that raised additional substantive comments on the DEIR not addressed in the standard form letter wording have been responded to individually within FEIR Part II.7.

**Table Att 2-1. Sierra Club Form Letter Commenters**

Form Letter	Date
I-Suzanne A'Becket-1	December 19, 2019
I-Inna Abramova-1	December 18, 2019

## Letter I-Suzanne A'Becket-1

**From:** [Suzanne A'Becket \(8pawprints@sbcglobal.net\)](mailto:8pawprints@sbcglobal.net) [Sent You a Personal Message](#)  
**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Thursday, December 19, 2019 9:11:01 AM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Suzanne A'Becket

Dear Mr. Chao:

I encourage the Department of Water Resources to revise its proposed operations plan for the State Water Project.

As you no doubt know, the Bay-Delta ecosystem has been severely depleted of freshwater flows for years, and that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

David Adams

Dear CA Department of Water Resources,

Dear Mr. Chao:

I'm shocked to learn DWR is proposing to INCREASE diversions from the Delta. How can you ignore the findings of our own SWRCB that the Delta and it's tributaries need GREATER fresh water flows? This proposal is a direct and dire threat to the fish and other wildlife that depend on adequate flows.

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

**Date:** Wednesday, December 18, 2019 5:57:02 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Evette Andersen

Dear CA Department of Water Resources,

Dear public-servant employee, Mr. Chao -

Respectfully.

As a lifelong coastal Californian, an over four decade adult working, taxpaying, voting Rural American and one of your 39.5 million employers, I strongly urge the Department of Water Resources(DWR) to revise its proposed operations plan for the State Water Project.

As you may be aware, for years, the Bay-Delta ecosystem:

- . has been severely depleted of freshwater flows
- . led to the loss of natural habitat for species
- . reduced the livelihood of residents in Delta communities

It could be said, DWR's present proposal will worsen matters by:

- . proposing to increase freshwater exports
- . reducing flows through the Bay-Delta estuary
- . weakening protections in an already vulnerable ecosystem for salmon and other imperiled species

Multiple millions of Californians' collective response to the above its, it's unacceptable. Please honor and respect the stewardship, duties and responsibilities within your job description by advocating OUR state needs to:

- . operate it's water management systems in a manner that is in accordance with the established standards within the Delta Reform Act's policy
- . reduce reliance on the Delta
- . strengthen protections for California's native fish and wildlife species

With appreciation for your time and thoughtful consideration.

Every good intention.

Sincerely,

Rita Arena

## Letter I-Alejandro Artigas-1

**From:** [Alejandro Artigas \(alexart3@yahoo.com\) Sent You a Personal Message](#)  
**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Wednesday, December 18, 2019 6:44:39 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Alejandro Artigas

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Marion Barry

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Darryl Bell

**From:** [Elizabeth Berteaux \(birdtrax@dcn.davis.ca.us\)](mailto:Elizabeth.Berteaux@birdtrax.dcn.davis.ca.us) Sent You a Personal Message  
**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Wednesday, December 18, 2019 5:39:44 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

1-1

Sincerely,

Elizabeth Berteaux

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Sara C. Blunt

Dear CA Department of Water Resources,

Dear Mr. Chao:

My family, friends and I strongly urge the Department of Water Resources (DWR) to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is totally unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species.

My family, friends, and I thank you.

Sincerely,

Allen Bohnert

Dear CA Department of Water Resources,

Dear Mr. Chao:

The current Department of Water Resources plan for the State Water Project is UNACCEPTABLE. Your plan MUST BE revised. It will do MUCH DAMAGE to the Sacramento/San Francisco Delta. Water flows must be increased, not used as in your Plan.

California needs to operate it's water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

**Subject:** LTO of SWP Project - public comment  
**Date:** Wednesday, December 18, 2019 6:21:01 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Christopher Boyd

**Date:** Thursday, December 19, 2019 12:41:56 AM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

J Michael Brown

## Letter I-Nancy Byers-2

**From:** [Nancy Byers \(biotechberk@yahoo.com\) Sent You a Personal Message](#)  
**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Sunday, December 22, 2019 1:26:59 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Nancy Byers  
2009 Prince St.

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Carl Cartwright

**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Wednesday, December 18, 2019 9:52:13 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Amelia Clark

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Kristen Conner

## Letter I-Jane Crist-1

**From:** [Jane Crist \(jane@janecrist.com\) Sent You a Personal Message](mailto:jane@janecrist.com)  
**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Thursday, December 19, 2019 7:07:50 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Jane Crist

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Dear CA Department of Water Resources,

Dear Mr. Chao:

We need to keep our water. The entire San Francisco Bay and Delta system of natural resources must be maintained to protect the indigenous species of fish, birds, flora and fauna. If we continue to destroy, deplete and put profits over ecological preservation we risk catastrophic implication on our habitats and ecological balance.  
Thank you

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

## Letter I-Lynnette Delgado-1

**From:** [Lynnette Delgado \(lynnettedelgado@comcast.net\) Sent You a Personal Message](#)  
**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Wednesday, December 18, 2019 5:49:46 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Lynnette Delgado

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Kathleen Djordjevich

## Letter I-Joshua Dubansky-1

**From:** [Joshua Dubansky \(dubansky@gmail.com\) Sent You a Personal Message](#)  
**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Wednesday, December 18, 2019 7:01:19 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Joshua Dubansky

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Dennis Eicholtz

**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Wednesday, December 18, 2019 5:37:19 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Dominick Falzone  
745 S Normandie Ave Apt 108

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Larry Fish

**Date:** Wednesday, December 18, 2019 5:55:37 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Sara Fung

**Subject:** LTO of SWP Project - public comment  
**Date:** Thursday, December 19, 2019 8:42:40 AM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Helen Garner

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Denise Goldberg

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

The Bay-Delta ecosystem has been severely depleted of freshwater flows and that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities. Your current proposal will only make things worse! DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in this already vulnerable ecosystem.

That is not acceptable. It is crucial for California to operate our water management systems in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthening protections for California's native fish and wildlife species. The stresses of climate change only make this more important!

Thank you.

**Date:** Wednesday, December 18, 2019 5:17:06 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Perry Gx

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Charesa Harper  
1217 Tamalpais St

**Date:** Wednesday, December 18, 2019 5:12:51 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I believe it is essential that the Department of Water Resources revise its proposed operations plan for the State Water Project.

The Bay-Delta ecosystem has been severely depleted of freshwater flows, and that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Sarah Hearon

**Date:** Wednesday, December 18, 2019 10:50:03 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Faith Herschler  
10347 W Briar Oaks Dr Apt D

## Letter I-Allan Hogle-1

**From:** [Allan Hogle \(allan@energyzones.com\)](mailto:allan@energyzones.com) Sent You a Personal Message  
**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Wednesday, December 18, 2019 6:14:29 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I am writing as a concerned Californian and one who has a strong interest in the environment and all those "downstream."

I strongly request the Department of Water Resources revise its proposed operations plan for the State Water Project.

As a former Bay Area resident I have paid attention to and noticed that for years, the Bay-Delta ecosystem has been severely depleted of freshwater flows resulting in the loss of natural habitat for species and reduced livelihood for residents in Delta communities.

This current proposal will make things worse, not better. DWR's proposal to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already compromised ecosystem is beyond UNACCEPTABLE!

It is unthinkable!

California needs to operate its water management systems in a manner in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and in manner that strengthens protections for California's native fish and wildlife species as well as livelihoods of those closest to this very real impact.

**MORE FRESH WATER IN THE DELTA NOW!**

I am counting on you to do the right thing. Please keep me apprised. I would like to be notified when you have accomplished this.

Thank you.

Sincerely,

Allan Hogle

**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Thursday, December 19, 2019 9:03:16 AM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Ken Hughes  
7800 Woodman Ave Apt 21

**Date:** Saturday, December 28, 2019 10:54:17 AM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Allison Isaacson  
768 Barry Ave  
Fortuna, CA 95540

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

**Date:** Wednesday, December 18, 2019 4:54:55 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Adam Kaplan

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

James Kerr

**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Wednesday, December 18, 2019 9:59:54 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Brenda Koenig

**Date:** Wednesday, December 18, 2019 5:35:49 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Karen Krulevitch

**Date:** Thursday, December 19, 2019 9:22:56 AM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Ron Landskroner  
4231 Montgomery St Apt 106

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

## Letter I-Eleanor Lewis-1

**From:** [Eleanor Lewis \(eleanor\\_lewis@stanfordalumni.org\) Sent You a Personal Message](#)  
**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Friday, January 3, 2020 9:56:02 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I am extremely concerned about protecting the health and the ecosystem in the bay delta. And I don't want more water diverted to agricultural interests that need to make their operations more efficient and working in harmony with the available natural resources. Let's not destroy California's riches. I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Eleanor Lewis

**Date:** Thursday, December 19, 2019 11:43:02 AM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Jimmy Lopez  
1120 N Divisadero St

**Date:** Wednesday, December 18, 2019 8:37:38 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Anne Lyon

**Date:** Wednesday, December 18, 2019 6:26:01 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its puzzling proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows, which has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is negligent and unacceptable.

California needs to operate its water management systems in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Marc Maloney

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

## Letter I-Daniel Mckeighen-1

**From:** [Daniel Mckeighen \(metalhead\\_hellyeah@yahoo.com\) Sent You a Personal Message](#)  
**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Saturday, December 21, 2019 12:59:18 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Daniel Mckeighen  
711 University Ave Apt 2214

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Elisabeth Merrill

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

## Letter I-Sylvia Morris-1

**From:** [Sylvia Morris \(sylmor48@gmail.com\) Sent You a Personal Message](#)  
**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Wednesday, December 18, 2019 10:34:19 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Sylvia Morris  
537 Piney Way Apt A

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

We urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been depleted of freshwater flows. This destroys natural habitats for animals and reduces the livelihood of the people in Delta communities.

This current proposal will cause more damage. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish.

Let's work hard and creatively to prevent this damage to our beautiful state.

Let's operate our water management systems so that we work with the Delta Reform Act's policies .....reducing reliance on the Delta water and protecting our native fish and wildlife.

Thank you!

Sincerely,

Ken and Kathy Myers

**Date:** Wednesday, December 18, 2019 5:26:07 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Anna Narbutovskih  
14288 Woodland Dr

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Wednesday, December 18, 2019 5:34:45 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Karen O'Rourke

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Hillary Ostrow  
5835 Hesperia Ave  
Encino, CA 91316

**Date:** Wednesday, December 18, 2019 5:47:21 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Donna Pedroza  
1801 Shoreline Dr Apt 303

**Date:** Wednesday, December 18, 2019 4:56:24 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Debra Phillips

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Kathy Popoff

## Letter I-Mary Ragsdale-1

**From:** [Mary Ragsdale \(maryfrap7@yahoo.com\)](mailto:Maryfrap7@yahoo.com) Sent You a Personal Message  
**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Thursday, December 19, 2019 10:28:19 AM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Mary Ragsdale

Dear CA Department of Water Resources,

Dear Mr. Chao:

As a native resident of California, I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is highly unacceptable and shouldn't be allowed to happen.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you for taking the time to read this.

Sincerely,

Brian Ramsey

**Date:** Tuesday, January 7, 2020 10:05:08 AM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Karen Reibstein

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

William Rietzel

**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Wednesday, December 18, 2019 5:21:54 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Ray Rodney

**From:** [Paula Rufener \(phoebenhouse@aol.com\)](mailto:phoebenhouse@aol.com) Sent You a Personal Message  
**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Wednesday, December 18, 2019 9:55:53 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Paula Rufener

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Wednesday, December 18, 2019 6:50:44 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Cheryl Schmidt  
1845 Ivanhoe Ave

**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Friday, December 20, 2019 1:43:21 AM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

The Delta is the key resource here: it is the NATURAL water flow in this region of California. Everything we do in and around the Delta should preserve its ecology, or enhance it, if that is possible. Anything that degrades its ecology will have unpredictable -- and most likely significant negative -- consequences.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Dear CA Department of Water Resources,

Dear Mr. Chao:

As a San Francisco resident who is concerned about the health of the Bay, our environment, and wildlife, I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is totally unacceptable, and there is no justification for it.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Judy Schultz

**From:** [Robert Seltzer \(rsscpa@earthlink.net\) Sent You a Personal Message](mailto:rsscpa@earthlink.net)  
**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Wednesday, December 18, 2019 6:43:38 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Robert Seltzer

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Nancy Sikes

**Date:** Wednesday, December 18, 2019 6:37:13 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Bret Smith

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

The SF Bay is shrinking and suffering enough due to development and disappearing wetlands. Do not aggravate this situation with reduced waterflows to the bay. California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Charles Smith

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Richard Spicer

## Letter I-Neal and Nancy Steiner-1

**From:** [Neal And Nancy Steiner \(nrspacific@yahoo.com\) Sent You a Personal Message](#)  
**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Thursday, December 19, 2019 6:49:26 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Neal And Nancy Steiner

**Date:** Saturday, December 21, 2019 8:47:50 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Jeffrey Streicher  
3772 Sebren Ave  
Long Beach, CA 90808

Dear CA Department of Water Resources,

Dear Mr. Chao:

I'm including this line to indicate that I'm a real person and that this issue is important to me.

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Andre Tarverdians

**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Wednesday, December 18, 2019 6:06:39 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

William Tippets

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Charles Tribbey

**Subject:** LTO of SWP Project - public comment  
**Date:** Wednesday, December 18, 2019 9:56:35 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Carol Uschyk

**Date:** Wednesday, December 18, 2019 5:33:55 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Robyn Virga

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Fran Watson

## Letter I-Julie Werfelmann-1

**From:** [Julie Werfelmann \(13jdixon13@gmail.com\) Sent You a Personal Message](#)  
**To:** [LTO](#)  
**Subject:** LTO of SWP Project - public comment  
**Date:** Friday, December 20, 2019 2:34:47 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Julie Werfelmann  
6720 N Warren Ave

**Date:** Wednesday, December 18, 2019 9:13:11 PM

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Pamela and David Williams

---

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Dale Wright

Dear CA Department of Water Resources,

Dear Mr. Chao:

I strongly urge the Department of Water Resources to revise its proposed operations plan for the State Water Project.

For years, the Bay-Delta ecosystem has been severely depleted of freshwater flows that has led to the loss of natural habitat for species and reduced the livelihood of residents in Delta communities.

This current proposal will only make things worse. DWR is proposing to increase freshwater exports, reduce flows through the Bay-Delta estuary, and weaken protections for salmon and other imperiled fish in an already vulnerable ecosystem.

This is unacceptable.

California needs to operate its water management systems in a manner that is in accordance with the Delta Reform Act's policy of reducing reliance on the Delta and strengthens protections for California's native fish and wildlife species. Thank you.

Sincerely,

Anastasia Yovanopoulos
