Deputy Director, State Water Project
Department of Water Resources

After a very dry start to the water year, above average precipitation in February has improved water supply conditions throughout California, moving them toward historic averages. At the same time, Delta exports have been reduced to meet requirements in place to protect several critical fish species. After considering the updated water supply forecast along with a forecast of export capabilities, the Department of Water Resources (DWR) is increasing the State Water Project (SWP) allocation from 15 to 30 percent of SWP contractors' requested Table A amounts for 2024 for most contractors, as shown in Attachment A – 2024 SWP Allocation Table, Updated, March 22, 2024.

To determine the available SWP water supplies, DWR considers several factors including SWP contractors' 2023 carryover supplies into 2024, projected 2024 demands, existing storage in SWP conservation facilities, estimates of future runoff, SWP operational and regulatory requirements under the Federal Endangered Species Act and California Endangered Species Act, and water rights obligations under the State Water Resources Control Board's authority. This allocation increase takes into account snow survey measurements and data through March 1 as reflected in the runoff forecasts outlined in Bulletin 120. DWR may revise the SWP allocation if hydrologic conditions change.

To schedule SWP water deliveries under this allocation, DWR will utilize the 30-percent water delivery schedules submitted by SWP contractors in October 2023 (as part of initial requests) or as revised with any subsequent updates. If a contractor foresees any

changes to their water delivery schedule, please communicate such changes to DWR in a timely manner.

If you have any questions or need additional information, please contact John Leahigh, Assistant Division Manager, Water Management, SWP Division of Operations and Maintenance, at (916) 902-9876.
