

## **DANIEL L. WADE, P.E., G.E.**

---

Daniel L. Wade, P.E., G.E., is the Director of San Francisco Public Utility Commission's (SFPUC) Water Capital Programs. In this role, he has overall responsible charge for the successful delivery of over 100 projects in the Water System Improvement Program (WSIP), valued at nearly \$7 billion, including dams, reservoirs, transmission facilities (e.g., tunnels, pipelines, pump stations) and other related water infrastructure, to provide reliable, affordable, high quality water in an environmentally sustainable manner to 26 wholesale customers located throughout the Bay Area and to retail customers in San Francisco.

He previously managed the Sunol Valley Region of the WSIP from 2007 to 2013, which included senior project management oversight of \$1.4 billion in projects, including the role of senior project manager of the \$800 million Calaveras Dam Replacement Project, the largest and one of the most complex projects in the WSIP.

Prior to joining the SFPUC in 2007, he worked as a consultant for 18 years in the water infrastructure industry as Principal Engineer and Vice President with MWH Global. His consulting and team leadership activities included work on the Folsom Dam Raise and Auxiliary Spillway Project, Shasta Dam Raise and Water Resources Investigation, LL Anderson Dam Spillway Modifications, and Big Tujunga Dam Rehabilitation.

A member of the Board of Directors of the U.S. Society of Dams from 2011 to 2017, including the last year as Vice President, he continues to serve as an ex-officio member of the Board. He was named one of the 25 Top Newsmakers by Engineering News Record (ENR) magazine in January 2015 for his role in the WSIP.

He earned his B.S. Degree in Civil Engineering from the University of California at Berkeley, and his M.S. Degree in Civil/Geotechnical Engineering from Virginia Polytechnic Institute and State University. He is a registered Civil and Geotechnical Engineer in California.
