

### \*\*\* Delta Alert \*\*\* Harmful algal bloom at Big Break Regional Shoreline

A "Danger" Advisory Level has been issued for the kayak launch area at Big Break Regional Shoreline. For more information, visit [My Water Quality](#).

### Delta flood risk management assessment district feasibility study and Delta levee financing options

The Delta Protection Commission reviewed the final [Delta Levee Financing Feasibility Study](#) at the Commission meeting on May 17. The Commission voted unanimously (14-0) to transmit the final report to the Department of Water Resources.

### Free Fishing Days in California

The first free day of fishing for 2018 is being presented by California Department of Fish and Wildlife, on Saturday, July 7. Have you ever wanted to learn to fish, or maybe you have a desire to feel the pull of the line once again? Head out to your favorite Delta location for Free Fishing Day — no license required! Have a great time, but remember, fishing regulations, such as bag and size limits, gear restrictions, report card requirements, fishing hours, and stream closures remain in effect. For more information visit the [CDFW website](#).

### Delta Protection Commission meeting

The Delta Protection Commission will be meeting July 19, from 5:30 p.m. to 7:30 p.m., at the Jean Harvie Community Center Auditorium at 14273 River Road, Walnut Grove ([MAP](#)). View the [DPC calendar](#) for all 2018 Commission meetings and community events.

### Delta Heritage Forum date announced

The Delta Heritage Forum, which will focus on efforts to preserve and tell Delta stories while also providing opportunities for partnerships, collaboration, and networking, is Friday, July 20, from 9:00 a.m. to 3:00 p.m. at the Jean Harvie Community Center, 14273 River Road, Walnut Grove ([MAP](#)). More information will be coming soon.

### How the Interagency Ecological Program uses data to inform management decisions

This second in a series of three brown bag seminars will be held Tuesday, July 24, from 12:00 p.m. to 1:00 p.m. This seminar will discuss Delta Smelt fecundity (ability to produce offspring) and its relationship to body length. This seminar will also cover special spawning strategies to ensure success in a variable environment. These strategies can help us improve Delta Smelt population-level egg production and long-term resilience. Click [here](#) for more information.

### Vision for the Calabazas Creek, San Tomas Aquino Creek, and Pond A8

The San Francisco Estuary Institute recently released a resilient landscape vision that benefits both flood management and bayland habitat restoration for the interface of Calabazas Creek, San Tomas Aquino Creek, and Pond A8 in South San Francisco Bay. The vision, developed in coordination with a team of regional experts and scientists, explores a reconfigured shoreline that could improve ecosystem health and resilience, reduce maintenance costs, and protect surrounding infrastructure. For more information, click [here](#).
