VOC	volatile organic compound	

1 Introduction

In accordance with the Governor's Emergency Proclamation issued on July 30, 2021, the California Department of Water Resources, California Energy Commission, and California Independent System Operator have partnered to develop the Strategic Reliability Reserve, which will deploy temporary power generators for use in extreme events. The California Department of Water Resources is procuring, installing, and licensing temporary generator units at existing power generation sites. Units will be placed at existing power generation sites to feed directly into the grid as needed and at the direction of the California Independent System Operator. Each unit will be able to produce approximately 30 megawatts—enough to power approximately 18,000 average-sized homes. Each unit will be powered by natural gas with the capability of running on a blend of up to 75% hydrogen.

This hazardous materials assessment was conducted as part of due diligence for the installation of power generating units at 1750 Claribel Road, Modesto, Stanislaus County, California 95357 (project site) under the Strategic Reliability Reserve program. The project site is located south of Claribel Road and east of the Lateral Number One canal (Figure 1). The project site can be accessed via Claribel Road. The project site is approximately 11.37 acres located on assessor's parcel number (APN) 082004036000.

The proposed project includes installation of 123 natural gas generators arranged in 25 rows on the project site. Associated infrastructure would include transformers and generator step-up transformers (GSUs) for each generator unit. Project activities include site preparation, grading, trenching, generator installation, and energization.

The purpose of this hazardous materials assessment is to determine if there are any potential environmental concerns on the project site related to hazardous materials and/or waste. This hazardous materials assessment consists of a review and summary of regulatory agency records, historical aerial photographs, historical topographic maps, historical city directories, and historical fire insurance maps; interviews with site representatives; and a site reconnaissance. This hazardous materials assessment includes components of a Phase I Environmental Site Assessment (ESA) as defined by American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E1527-21), but does not meet all of the requirements of a Phase I ESA. As such, this hazardous materials assessment does not fulfill the due diligence requirements for landowner liability protections under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).

2 Physical Setting

The project site is located at 1750 Claribel Road in the City of Modesto, Stanislaus County. The average elevation of the project site is approximately 112 feet above mean sea level (Appendix A). Surrounding land uses mainly include orchard and other farmland. The project site is bounded to the north by Claribel Road followed by the Lateral Number One canal and vacant commercial land; to the east by orchards; to the south by row crops; and to the west by Lateral Number One canal followed by a mobile home park (Morningside Mobile Home Park) (Figure 1). According to groundwater data provided in the EDR report (Appendix A), four USGS wells were identified between 0.50 mile and one mile from the project site. The reported depth to groundwater for these four wells ranged from 31.34 to 41.16 feet below surface when last measured in 2005. No well data for the project site was identified in the EDR report.

Dudek consulted the online California Water Board Groundwater Information System for information about public supply wells in the project site area (GAMA 2022). A domestic water supply well was identified on the eastern adjoining property, approximately 70 feet from the project site. According to information in GAMA, the well was tested in 1992 for herbicide-related chemicals, including atrazine, bromacil, diuron, prometon and simazine. Concentrations of all tested chemicals were less than the laboratory reporting limit and California State Maximum Contaminant Levels (MCLs), as available.

A well was observed on the eastern portion of the project site during the site reconnaissance (Section 6, Figure 2). This well was not identified on the EDR Report or in GAMA. It is possible this is the well identified in GAMA 70 feet east of the project site and was improperly georeferenced in the GAMA database. Dudek did not observe another well east of the project site, nor did Dudek conduct reconnaissance on the eastern adjoining property.

A municipal well was identified in both the EDR Report and GAMA on the western adjoining mobile home park, approximately 125 feet west of the project site. Water quality samples were collected between 2010 and 2020 and analyzed for water quality parameters, metals, and volatile organic compounds (VOCs). No VOCs were detected above the laboratory reporting limits. Arsenic, iron, manganese, sulfate and zinc were detected in 2020 above laboratory reporting limits. The concentration of arsenic was not detected above the Environmental Protection Agency's (EPA) National Primary Drinking Water Regulations (NPDWR) MCL of 0.010 mg/L (US EPA 2022). Iron, manganese, sulfate and zinc are contaminants that are listed under the National Secondary Drinking Water Regulations as Secondary MCLs, which are non-enforceable guidelines set by the EPA. Sulfate and zinc were not detected above the Secondary MCLs. In June 2020, iron and manganese were detected at 1,100 μ g/L and 110 μ g/L, respectively, above their secondary MCLs of 300 μ g/L and 50 μ g/L, respectively. In July 2020, concentrations of both metals were detected below their respective Secondary MCLs (130 μ g/L and 20 μ g/L, respectively. Nitrate concentrations were all below the Secondary MCL.

Dudek conducted a search for oil and gas wells within 1 mile of the project site (CalGEM 2022). No oil and gas wells were identified within 1 mile of the project site.

Dudek searched the National Pipeline Mapping System (NPMS) online database, which provides a public map viewer application that displays data related to gas transmission and hazardous liquid pipelines, liquefied natural gas plants, and breakout tanks under the Department of Transportation Pipeline and Hazardous Material Safety Administration jurisdiction (DOT 2022). One active natural gas transmission pipeline was identified running along Claribel Road adjoining the project site to the north. The natural gas pipeline is operated by Pacific Gas & Electric Co.

The southern and eastern portions of the project site are currently used for agricultural purposes in the form of seasonal/row crops. Historical resources (see Section 7) indicate the project site was used for agricultural purposes from the 1930s through present day. Evidence indicates orchards were present on the project site for several decades (the 1930s through at least the 1970s) followed by seasonal crops until the present. As with all agricultural properties, pesticides and herbicides were likely used. The chemicals of concern associated with these compounds, such as organochlorinated compounds and metals, are bioaccumulative and persistent in soil. Therefore, the longer a property is used for agricultural purposes, the more likely there is an accumulation of these chemicals of concern. Considering the ongoing long-term agricultural use and lack of redevelopment of the southern portion of the project site, there is a potential for elevated concentrations of pesticide and herbicide-related compounds in shallow soils. Typically, this is considered a potential impact for unrestricted land use. However, based on the proposed future commercial and unoccupied use of the project site, it is unlikely that residual concentrations of pesticide-related compounds would be above applicable risk-based concentrations for the proposed future land use as an energy storage facility. Therefore, this historical agricultural use is not considered a potential impact to proposed project operations. Potential impacts during construction activities may be present and are discussed in Section 10.

3 Public Agency Records Search

Table 1 summarizes the environmental databases that were searched as required by ASTM E1527-21, as well as additional environmental databases that provide information on hazardous materials and petroleum products on the project site ("target property" is the term used by EDR.). The comprehensive list of databases is included in the EDR Radius Map Report, which was prepared on October 31, 2022 (Appendix A).

Table 1 lists the databases that were searched, search distances from the project site, whether the project site was listed, and the number of sites identified.

Table 1. Regulatory Database Search Summary

Acronym	Database	Search Distance	Project Site Listed?	Number of Surrounding Sites Listed
NPL	National Priorities List (including proposed NPL sites and NPL Liens [target property only])	1 mile	No	0
Proposed NPL	Sites proposed for NPL	1 mile	No	0
Delisted NPL	NPL Deletions	1 mile	No	0
CERCLIS - Federal Facility	Comprehensive Environmental Response, Compensation, and Liability Information System for the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) with U.S. Environmental Protection Agency Federal Restoration and Reuse Office involvement	0.5 miles	No	0
CERCLIS - SEMS	CERCLA Superfund Enterprise Management System	0.5 miles	No	0
CERCLIS NFRAP (SEMS ARCHIVE)	No Further Remedial Action Planned – CERCLA SEMS Archive	0.5 miles	No	0
CORRACTS	Resource Conservation and Recovery Act (RCRA) Corrective Action	1 mile	No	0
RCRA TSDF	RCRA – Transportation, Storage, and Disposal Facilities		No	0
RCRA-LQG	RCRA Large Quantity Generators	0.25 miles	No	0
RCRA-SQG	RCRA Small Quantity Generators	0.25 miles	No	0
RCRA-VSQG	RCRA Very Small Quantity Generators	0.25 miles	No	0
ERNS	Emergency Response Notification System	Target property	No	0
LUCIS	Land Use Control Information System – Institutional Control/Engineering Control	0.5 miles	No	0
US ENG CONTROLS	Federal sites with Engineering Controls	0.5 miles	No	0
US INST CONTROLS	Federal sites with Institutional Controls	0.5 miles	No	0
RESPONSE	State- and Tribal-Equivalent CERCLIS – Confirmed Release List	1 mile	No	0
SWF/LF	State and Tribal Landfill and/or Solid Waste Disposal Site	0.5 miles	No	0
LUST	State Leaking Underground Storage Tank	0.5 miles	No	0
Indian LUST Tribal LUST		0.5 miles	No	0

Table 1. Regulatory Database Search Summary

Acronym	Database	Search Distance	Project Site Listed?	Number of Surrounding Sites Listed
AST	State and Tribal Registered Aboveground Storage Tank	0.25 miles	No	0
UST	State and Tribal Registered Underground Storage Tank	0.25 miles	No	0
Indian UST	Registered Underground Storage Tank on Tribal Land	0.25 miles	No	0
FEMA UST Federal Emergency Management Agency (FEMA) owned Registered UST		0.25 miles	No	0
Indian VCP	Voluntary Cleanup on Tribal Land	0.5 miles	No	0
VCP	State and Tribal Voluntary Cleanup	0.5 miles	No	0
Brownfields State and Tribal Brownfields		0.5 miles	No	0
Additional environmental records, including local lists Varies Yes 1				

Note: The search distances in the EDR report and listed in this table are equal to or greater than the search distances required by ASTM E1527-21.

3.1 Project Site

The project site address, 1750 Claribel Road, was identified in three databases searched by the EDR under the following name: Modesto Irrigation District/Claribel Substation. The project site was identified in the following databases: CUPA Listings, CERS, and FINDS.

CUPA Listings, CERS: California Environmental Reporting System (CERS) provided information about the facility and the regulatory status. The project site is listed as a Chemical Storage Facility, it was subject to three compliance evaluations in August 2013, September 2016 and September 2019 by the Stanislaus County Environmental Resources; no violations were reported. The project site's status is currently active. More information regarding the project site's hazardous material storage and CERS reporting is discussed in Section 4.6

FINDS: Facility Index System (FINDS) is a national registry supported by the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, treat, store, or dispose of hazardous waste. The project site was identified as Modesto Irrigation District/Claribel Substation, due to the hazardous material storage activity identified in the CUPA and CERS databases. No violations were listed.

These listings are administrative in nature, and indicate storage and use of hazardous materials on the project site, but do not indicate an unpermitted release of hazardous materials that could create a potential impact to the proposed project.

3.2 Adjoining Properties

One site was identified adjoining the project site.

Rodin Ranch, 2030 Claribel Road. This site adjoins the main portion of the project site to the east. The adjoining property is listed in the RCRA NonGen / NLR database, indicating the site has handled but does not generate, hazardous waste. No evaluations or violations for this property were reported. As such, this listing does not appear to indicate a potential impact to the project site.

3.3 Nearby Properties

No nearby properties were identified within the applicable search radii surrounding the project site.

3.4 Unmapped Sites

Unmapped sites are flagged by EDR but not mapped due to insufficient address information. They are usually included in the database search report because they are in the same zip code as the project site. The EDR report identified one unmapped site in the orphan summary, Modesto Rock Well Closures, on the CPS-SLIC database. An online search was completed for the site; however, no information regarding the site or its location could be found.

4 Online Regulatory Databases

In addition to the database search conducted by EDR, Dudek conducted additional searches of online databases, as outlined below.

4.1 Stanislaus County Environmental Resources

The Stanislaus County Environmental Resources acts as the Certified Unified Program Agency (CUPA) and as the local oversight regulatory program to obtain information about potential spills, cleanups, tanks, or chemical use that may have impacted the environmental conditions of the project site. This agency does not have an accessible online database; therefore, a records request was submitted on November 14, 2022. On November 23, 2022 a response was received from Stephanie Getz at Stanislaus County Environmental Resources. A Hazardous Materials Business Plan (HMBP) exists for the site.

4.2 San Joaquin Valley Air Pollution Control District

Dudek reviewed the California Air Resources Board (CARB) Pollution Mapping Tool, which includes emissions data for toxic air pollutants along with Greenhouse Gases data from larger facilities in California (CARB 2022). No sites were identified on or within 1 mile of the project site.

4.3 CalRecycle Solid Waste Information System

Dudek reviewed the California Department of Resources Recycling and Recovery (CalRecycle) Solid Waste Information System online database (CalRecycle 2022). The database has information for all solid waste facilities, operation, and disposal sites in California. No sites were identified on or within 1 mile of the project site.

4.4 State Water Resources Control Board GeoTracker Database

Dudek accessed GeoTracker, the Regional Water Quality Control Board's (RWQCB) online database, to search for contaminated sites/release cases on or within 1 mile of the project site (GeoTracker 2022). No contaminated sites/release cases were found on the project site or within 1 mile of the project site.

4.5 Department of Toxic Substances Control EnviroStor Database

Dudek searched the Department of Toxic Substances Control (DTSC) EnviroStor database management system used for tracking cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known contamination (DTSC 2022). No sites were identified on or within 1 mile of the project site.

4.6 California Environmental Protection Agency Regulated Site Portal

Dudek reviewed the California Environmental Protection Agency Regulated Site Portal, which contains data about environmentally regulated sites and facilities in California (CalEPA 2022). Data sources for the portal include California Environmental Reporting System, the Department of Toxic Substances Control EnviroStor (DTSC 2022), the State Water Resources Control Board GeoTracker, California Integrated Water Quality System, and the Federal Toxics Release Inventory.

California Environmental Protection Agency sites are generally administrative in nature and identify sites that have environmental permits or that handle hazardous materials or generate hazardous waste, but that do not necessarily have an uncontrolled release of hazardous substances to the environment.

The project site was identified under the name Modesto Irrigation District/ Claribel Substation. As discussed in Section 3.1, the project site is listed as a Chemical Storage Facility. As of 2021 the site stores mineral oil (petroleum product) in electrical equipment on site. The facility has had no reported violations. Additional information regarding the project site's regulatory status can be found in Section 3.1.

5 Interviews

5.1 Site Representative Interview

Dudek sent a site background questionnaire to the user of this report on October 12, 2022. Responses were received on December 2, 2022 from a representative of Enchanted Rock on behalf of Modesto Irrigation District (MID). Enchanted Rock would operate and maintain the project site, which would be owned by DWR.

A copy of the questionnaire is presented in Appendix B. Below is a summary to the questionnaire project site:

- MID has owned the project site since 2004; the site was previously owned by Michael Korman. No records of past uses have become available since MID obtained the project site.
- The project site is currently vacant, and there are no buildings on site.1
- The project site has not been subject to any spills and no environmental cleanups or remediation services
 have occurred on the project site. It is unknown whether any violations have occurred on the project site or
 if there are any documents relating to said information.
- The subject site has not been used for agricultural purposes; it is unknown whether pesticides, herbicides or insecticides have been applied.²

5.2 User-Provided Information

In accordance with ASTM E1527-21, to qualify for one of the Landowner Liability Protections offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, the tasks outlined in Section 6.2 through 6.6 of ASTM E1527-21 must be completed, including a search for environmental liens and activity use limitations (AULs). To facilitate this requirement, Dudek sent the following questions to the User of this report. Answers to these questions fulfill the requirement of Sections 6.2 through 6.6 of the ASTM Standard. Responses were received from Jorge Luis Quintero, Principal HEP Utility Engineer, CA Department of Water Resources - ESSR Office on November 16, 2022 (Appendix B), and are presented below.

1. **Question:** Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?

Response: No I am not aware.

2. Question: Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

Response: No I am not aware.

² As discussed in Section 7, Site History, the project site has been used for agricultural purposes since approximately 1937, and the southern portion of the project site is still cultivated.

12206.028 January 2023

⁴ As discussed in Section 6, Site Reconnaissance, the project site is partially developed with a substation and operations building.

- 3. **Question:** As the user of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
 - **Response:** DWR is in a similar same line of business as the site as we operate powerplants with electrical switchgear. DWR does not have specialized knowledge of the chemicals and process used.
- 4. **Question:** Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?
 - Response: Not applicable, site is being leased. No contamination is known.
- 5. Question: Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases?
 (a) Do you know the past uses of the property, (b) do you know of specific chemicals that are present or once were present at the property, (c) do you know of spills or other chemical releases that have taken place at the property, or (d) do you know of any environmental cleanups that have taken place at the property?
 - **Response:** No I am not aware. (a) The land was previously used as farm land. (b) I do not know of the specific chemicals present or once present at the property. (c) I do not know of any spills that have taken place at the property. (d) I do not know of any spills that have taken place at the property.
- 6. **Question:** As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?
 - **Response:** There are no obvious indicators that point to a presence or likely presence of contamination at the property.

6 Site Reconnaissance

A site reconnaissance was conducted on November 9, 2022, by Jamie Schnieders of Dudek. The site reconnaissance consisted of walking the project site, taking notes on observations, and taking photographs. Photographs are presented in Appendix C. Ms. Schnieders was primarily unaccompanied during the site reconnaissance; a Modesto Irrigation District employee provided access to the Claribel Substation portion of the project site.

6.1 Description of Project Site and Surroundings

The project site consists of an 11.37-acre parcel of land, currently occupied by the Modesto Irrigation District's Claribel Substation. There is a dirt lot and row crops located in the northeastern and southern portion of the project site, respectively (Photographs 1 through 3). Access to the project site is from Claribel Road to the north (Photograph 4). The northwestern portion of the project site is graded, covered in gravel, and enclosed by a stone wall; it contains the energy infrastructure and operations building (Photograph 5) and associated support features. A groundwater well is located along the eastern wall of the Claribel Substation (Photograph 6; Figure 2). Stormwater drainage in the Claribel Substation is directed toward an infiltration basin in the southwestern corner of the substation (Photograph 7). Stormwater on the remainder of the project site appears to flow toward the row crops to the south and pool in low-lying spots in the dirt lot (Photographs 1, 2, and 8).

High tension transmission lines run from the substation on the project site to the northwest, connecting to other transmission lines across the Lateral Number One canal (Photograph 9). One, large transformer connected to the substation infrastructure was observed in the center of the Claribel Substation (Photograph 5). Several felled, wooden power line poles were observed in the southeastern portion of the dirt lot on the project site (Photograph 10).

As observed during the site reconnaissance, the project site is bordered by the following:

- To the northwest, southwest, and east by cultivated orchards (Photographs 2 through 4)
- To the south by row crops (Photograph 3)
- To the west by Morningside Mobile Home Park (1512 Claribel Road; Photograph 11) and the Lateral Number One canal (Photograph 9)
- To the north by Claribel Road, the continuation of the Lateral Number One canal and an undeveloped, grass lot (Photograph 4)

The main areas of interest noted during the site reconnaissance are described in the following section.

6.2 Summary of Observations

Potable Water Supply or Source

A water supply well was observed on the project site along the eastern wall of the Claribel Substation (Photograph 6).

Sewage Disposal System

No evidence of public sewer systems or septic systems were observed on the project site.

Wetlands and Natural Waterways

Standing water was observed in the low-lying points of the dirt lot in the northeastern portion of the project site and in low-lying areas between the Claribel Substation and Claribel Road (Photographs 1 and 2). The infiltration basin in the southwestern corner of the Claribel Substation contained standing water (Photograph 7).

Surface Water Discharge

Surface water within the Claribel Substation appears to collect into the infiltration basin in the southwestern corner (Photograph 7). Surface water outside of the stone-walled substation collects in low-lying areas and is directed toward the row crops to the south (Photograph 8).

Distressed Vegetation

No distressed vegetation was observed on the project site.

Indications of Solid Debris Storage

Downed power poles were observed on the southern border of the dirt lot in the northeastern portion of the project site (Photograph 10). No staining was observed near the power poles. Trash appears to collect along the northeastern fence line on the project site (Photograph 12).

Hazardous Material and Petroleum Product Use and Storage

No hazardous material or petroleum storage was observed on the project site or on the adjoining properties. As discussed in Sections 3.1 and 4.6, mineral oils are stored on the project site. These are located within transformers, discussed in the Polychlorinated Biphenyl-Containing Items subsection below.

Unnaturally Discolored Ponds or Flowing Waters

No unnaturally discolored pools or flowing water were observed on the project site.

Groundwater Wells, Cisterns, Cesspools, or Septic Tanks

As noted in the Potable Water Supply or Source subsection above, one groundwater well was observed along the eastern wall of the Claribel Substation on the project site (Photograph 6).

Polychlorinated Biphenyl-Containing Items

One transformer, related to the substation, was observed within the Claribel Substation on the project site (Photograph 5). Pole-mounted transformers were observed on the west side of the Delta Mendota Canal, west of the project site (Photograph 11). As the site was developed between 2006 and 2009, and manufacturing of PCBs was banned in 1976, it is unlikely that associated transformers contain PCBs.

No other evidence of PCB-containing items, such as hydraulic equipment, was observed during the site reconnaissance.

Sumps or Ponds

Standing water was observed in the infiltration basin in the southwestern corner of the Claribel Substation and in low-lying areas in the northern and northeastern portions of the project site (Photographs 1, 2, and 7).

Abnormal Odor

No abnormal odors were noted on the project site.

Surface Staining, Corrosion, and Soil Disturbances

No staining or soil disturbances, including de minimis stains, were observed during the site reconnaissance.

Tanks, Drums, Totes, and Intermediate Bulk Containers

A water tank, associated with the water well, was observed along the eastern wall of the Claribel Substation. No other drums, totes, or bulk containers were observed on the project site during the site reconnaissance.

Agricultural Use

The southern portion of the project site is used for cultivated row crops (Photograph 3).

Off-Site Sources

As discussed above, pole-mounted transformers were observed on the west-adjoining property. There was no evidence of releases or other indications that these transformers have impacted the environmental condition of the subject property.

Fill Material

A splay of sediment was observed in the northeastern dirt lot on the project site (Photograph 13). The sediment had slightly different characteristics than the native soil and was likely dispersed during the recent rains prior to the site reconnaissance.

Unidentified Substance Containers

No unidentified substance containers were observed on the project site.

Pipelines

Markers indicating a PG&E natural gas pipeline were observed on the northern boundary of the project site. Two monitoring test stations, associated with the gas line, appeared north of the dirt lot in the northeastern portion of the project site (Photograph 14).

7 Site History

Based on a review of the historical aerial photographs, historical topographic maps, agency records, and the city directory report, the project site has not been residentially developed. The project site has been used for agricultural purposes since at least 1937, and portions of the project site are currently used for agricultural purposes (cultivated grass or row crops). Between 2006 and 2009, the northern section of the project site was developed as an electrical substation.

The northwestern, southwestern, southern, and eastern adjoining properties have been used primarily for agricultural purposes from 1937 to the present. The western adjoining property was used for agricultural purposes as early as 1937 until at least 1972. As of 1976 the western adjoining property was developed as a mobile home park. The northeastern adjoining property, across Claribel Road, has been used for agricultural purposes from as early as 1937 to present day. As early as 1950 it was also used for residential purposes, which lasted until approximately 2016.

Structures on the project site were constructed between 2006 and 2009. By this time, use of lead-based paint was prohibited in residential buildings; however, it is still used for commercial and industrial purposes. Asbestoscontaining material was phased out in the late 1980s, but not entirely banned until 2019. As such, there is a potential for asbestos-containing materials to be present in site structures.

7.1 Historical Aerial Photographs

Dudek reviewed historical aerial photographs obtained from EDR for 1937, 1950, 1957, 1963, 1967, 1972, 1976, 1984, 1993, 2006, 2009, 2012, and 2016 (Appendix D). Dudek also reviewed aerial photographs from Google Earth for 2022 (Google Earth 2022). The photographs provided background information to assess the possibility of past activities that could present environmental concerns. The aerial photographs are described in Table 2.

Table 2. Summary of Aerial Photographs

Date	Project Site	Adjoining and Surrounding Properties
1937	The project site appears to be used for agricultural purposes, specifically it appears as an orchard. A drainage swale is observed through the project site approximately 90 feet away from the northwest boundary, cutting through the northern and western project site boundaries. A road (the current Claribel Road) is observed parallel to the northern boundary of the project site. A canal (the current Lateral Number One) is observed parallel to the northwestern boundary of the project site.	All adjoining properties appear to be used for agricultural purposes. Surrounding properties appear to be agricultural and rural residential. Four structures are observed in the surrounding areas at approximately 800 feet to the south, 1,500 feet to the east, and 1,600 and 2,500 feet to the southwest respectively.
1950	The drainage swale is no longer visible on the project site. A graded dirt patch has appeared in the northern section of the project site. The remainder of the project site appears to still be used for agricultural purposes in the form of orchards.	A residential structure is observed approximately 100 feet north of the project site. The structure observed approximately 1,600 feet to the southwest appears to be further developed with additional structures on the property.
1957	The graded triangular shaped dirt patch is no longer observed; the entirety of the site is observed to be covered in orchard rows.	The surrounding areas appear similar to the 1950 aerial image.

Table 2. Summary of Aerial Photographs

Date	Project Site	Adjoining and Surrounding Properties
1963	The project site has had approximately 8 rows of the orchard removed from the center, along with a small triangular section in the upper part of the project site. The rest of the project site is still entirely occupied by orchard rows.	The structure directly south of the project site at an approximate distance of 800 feet no longer is observed. A structure to the southwest of the project site at an approximate distance of 1,500 feet is now observed.
1967	The western part of the project site now appears graded and no longer has orchard rows. The orchard rows have been returned to the center of the property.	Residential development is observed approximately 2,900 feet northwest of the project site.
1972	The project site is observed to be entirely covered in orchard rows.	A water retention pond is now observed 1,800 feet to the northeast of the project site. The current Claribel Road, running parallel to the northern project site boundary, appears to be paved now and is no longer a dirt road.
1976	The project site appears similar to the 1972 aerial image.	The adjoining property to the west has been turned into a multi residential site (current mobile home park) with internal roads.
1984	The project site appears to now be used for seasonal row crops. No more orchard rows are observed.	Approximately 2,100 feet north of the project site a residential building is observed. Approximately 800 feet south of the project site a residential building is observed.
1993	The project site appears to be used for agricultural purposes. The entirety of the site is covered in planted row crops.	The residential property to the south of the project site is no longer is observed. Approximately 650 feet south of the project site is a small area of graded land with a small structure observed on the graded land.
2006	Row crops are not observed, but the land still appears to be used for agriculture.	Additional residential structures can be observed approximately 2,500 feet northwest of the project site. A residential structure is observed approximately 700 feet south of the project site.
2009	The southern part of the project site appears to be graded and covered in row crops or cultivated grass. The northwest section of the project site has been graded, graveled, and now has an electrical substation. The northeast section appears to be graded dirt.	The surrounding area appears similar to the 2006 aerial image.
2012	The project site appears similar to the 2009 aerial image.	The surrounding area appears similar to the 2009 aerial image.
2016	The project site appears similar to the 2012 aerial image.	The residential structure on the northern adjoining property is no longer is observed, and all other structures on the site have been removed.
2022	The project site appears similar to the 2016 aerial image.	The surrounding area appears similar to the 2016 aerial image.

Note: See Appendix D for corresponding photographs for 1937 through 2016. The 2022 Google Earth photo is available online and therefore is not included in Appendix D.

7.2 Historical Topographic Maps

Dudek reviewed historical topographic maps from 1916, 1939, 1941, 1953, 1969, 1976, 1987, 2012, 2015, and 2018 (Appendix E). The topographic maps are a historical source that can be used to document the prior use of the project site and surrounding area. The topographic maps are described in Table 3.

Table 3. Summary of Topographic Maps

Date	Project Site	Adjoining and Surrounding Properties
1916	A canal (labeled as Lateral Number Six) is depicted on the northwest boundary of the project site.	Three schools are depicted on the map, including McHenry School to the north, Stoddard School to the northwest, and Bellpassi School to the southwest. A state highway is depicted to the north and east of the site. Buildings are depicted to the east, north, and west of the project site.
1939	The project site is now depicted as an orchard. A light duty paved road is now depicted alongside the northern boundary of the project site (the current Claribel Road).	The surrounding area to the west of the site is depicted as largely covered in orchards. More buildings are depicted in surrounding areas. The KTRB Radio Station is depicted to the southwest of the project site. A power transmission line runs approximately 1,100 feet south of the project site. A power transmission line is depicted by the label 110 kilovolt (110 KV).
1941	The project site is depicted similar to the 1939 topographic map.	The surrounding area appears similar to the 1939 topographic map.
1953	The road running alongside the northern boundary of the project site is now labeled as Claribel Road.	Several structures to the northwest and south of the project site in the surrounding areas are no longer depicted. Additional orchards are depicted in surrounding areas. Additional roads are now depicted in the surrounding area, including; Haydock Road, Morrill Ave, Claratina Ave, Coffee, Mable Road, Old Oakdale Road, and Sylvan Road. To the southeast of the site KBOX radio towers are depicted. An underground water pipeline now runs parallel with the 110 kilovolt powerline, which is denoted as Hetch Hetchy.
1969	Orchard rows are no longer present on the western part of the project site.	Claribel Road is now depicted as a secondary highway. The Hetch Hetchy (power line and pipeline) depicted south of the project site is now depicted as an aqueduct. A well is depicted a quarter mile to the east of the project site along with several other wells in the surrounding area. A residential building now appears directly north of the project site. Several other roads in the surrounding area are now depicted as secondary highways. A trailer park is depicted to the south.
1976	The project site is depicted similar to the 1969 topographic map.	A trailer park is depicted directly west of the project site. South of the project site the surrounding area is depicted as built up with additional trailer parks, a drive in theater and more residential areas and roads. Several areas to the northeast have been depicted as built up. To the northeast of the site a water retention basin is depicted.
1987	The project site is depicted similar to the 1976 topographic map.	The surrounding area south of the site is depicted with additional roads and residential areas.

Table 3. Summary of Topographic Maps

Date	Project Site	Adjoining and Surrounding Properties
2012	The project site no longer has any indications of agricultural use and is depicted as vacant.	Agricultural areas and buildings are no longer depicted on the surrounding areas. The surrounding areas to the northeast and south are depicted as developed areas. The canal formerly depicted as Lateral Number Six is now depicted as Lateral Number One.
2015	The project site is depicted similar to the 2012 topographic map.	A US Route marker now runs parallel with Claribel Road.
2018	The project site is depicted similar to the 2015 topographic map.	The surrounding area appears similar to the 2015 topographic map.

Note: See Appendix E for corresponding maps.

7.3 Fire Insurance Maps

Historical Sanborn fire insurance maps were requested from EDR. Sanborn maps provide information regarding the historical uses of the project site and surrounding properties. Sanborn maps typically exist for cities with populations of 2,000 or more; the coverage is dependent on the location of the subject site within the city limits. The Sanborn Map Report lists the project site as an unmapped property; no additional information was included in the report. The Sanborn Map Report is provided in Appendix F.

7.4 City Directory

City directory listings were requested from EDR (Appendix G). Table 4 details the findings of the city directory abstract. For the city directory review, the address 1512 Claribel Road was used to identify the western-adjoining property. Findings for the project site and for adjoining property addresses are summarized in Table 4.

Table 4. Summary of City Directory Listings

Address	Date	Listings		
Project Site				
1750 Claribel Road. There are	no listings for the proje	ect site.		
Adjoining to the West	Adjoining to the West			
1512 Claribel Road	This address was not included as part of the city directory address search performed by EDR. The current use according to the Tax Parcel land use description provided by EDR Lightbox ³ is mobile home park, trailer park.			
4724 Coffee Road	This address was not included as part of the city directory address search performed by EDR. The current use according to the Tax Parcel land use description provided by EDR Lightbox ⁴ is orchard (fruit/nut).			

DUDEK

Lightbox is an online database provided by EDR that provides georeferenced information on the target property. Additional information is available on Lightbox that isn't provided in the printed reports. A link to the Lightbox application for the project site is provided in the Radius Map Report in Appendix A.

Table 4. Summary of City Directory Listings

Address	Date	Listings		
Adjoining to the North				
5212 Coffee Road	This address was not included as part of the city directory address search performed by EDR. The current use according to the Tax Parcel land use description provided by EDR Lightbox ⁴ is rural/agricultural residence.			
5101 Oakdale Road	performed by EDR. The	he current use accor	the city directory address search ding to the Tax Parcel land use commercial-vacant land.

	1971		Residential	
Adjoining to the South				
No address available	The current use according to the Tax Parcel land use description provided by EDR Lightbox ⁴ is farm (irrigated or dry).			

8 Summary and Conclusions

The proposed project site, 11.37 acres in area, is located in the City of Modesto, Stanislaus County. The northern portion of the project site currently occupied by the Claribel Electrical Substation, and the southern and eastern portions of the project site are currently used for agricultural purposes in the form of seasonal/row crops. Adjoining properties include agricultural land use to the north, south and east, and a mobile home park to the west. Claribel Road runs along the northern boundary of the project site and the Lateral Number One canal runs along the northwestern boundary of the project site.

The project site has been used for agricultural purposes from at least the 1930s to present day. The northern portion of the project site was developed as an electrical substation between 2006 to 2009.

The project site is listed as a Chemical Storage Facility in the CERS and FINDS database for permitted chemical storage. The onsite substation stores mineral oils within the transformers. The substation operations were subject to three compliance evaluations in August 2013, September 2016, and September 2019 by the Stanislaus County Environmental Resources; no violations were reported. As such, hazardous material use and storage appear to be within compliance, and there is no evidence of releases on the project site.

9 Potential Impacts

Historical Agricultural Use: The southern portion of the project site is still used for agricultural purposes, while the northern portion was used for agricultural purposes until development of the substation between 2006 and 2009. Historical sources indicate the project site has been used for agricultural purposes since the 1930s, including orchards. As with all agricultural properties, pesticides and herbicides were likely used. The chemicals of concern, organochlorinated compounds and metals, are bio accumulative and persist in soil. Therefore, the longer a property is used for agricultural purposes, the more likely there is an accumulation of these chemicals of concern. Considering the ongoing long-term agricultural use, there is a potential for elevated concentrations of pesticide and herbicide-related compounds in shallow soils. Typically, this is considered a potential impact for unrestricted land use. However, based on the proposed future commercial and unoccupied use of the project site, it is unlikely that residual concentrations of pesticide-related compounds would be above applicable risk-based concentrations for the proposed future land use as an energy storage facility. Therefore, this historical agricultural use is not considered a potential impact for project site operation. However, impacts could occur during project construction, due to excavation and disturbance of site soils.

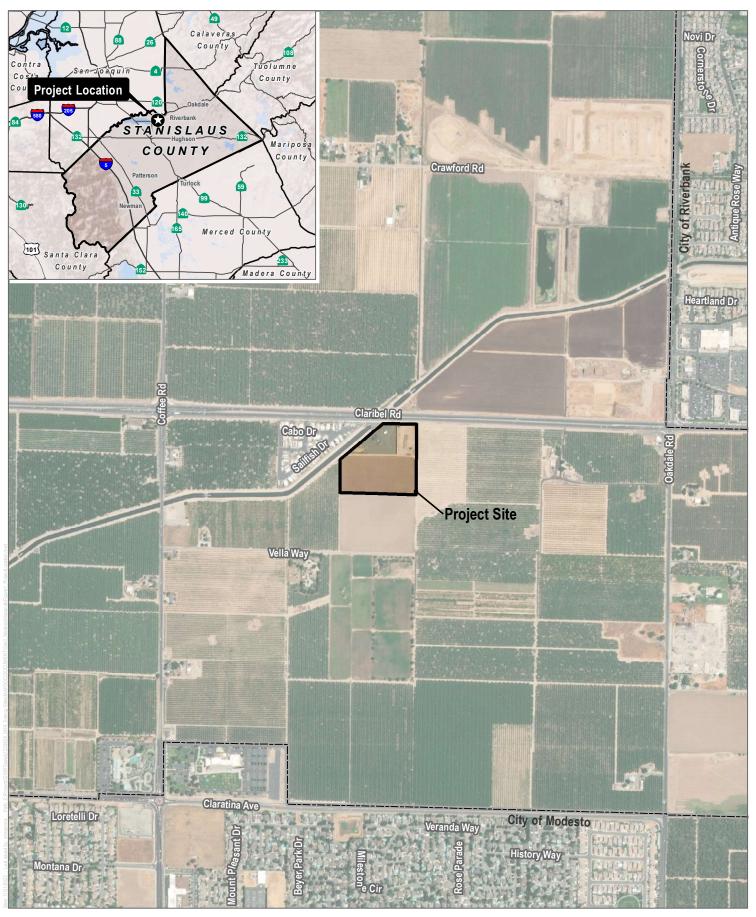

- Should project site construction require removal of site soils, soils should be screened prior to disposal or reuse to determine if pesticide- or herbicide-related compounds are above acceptable levels for the disposal or reuse facility.
- A health and safety plan should be put in place to ensure worker safety protocols are established and followed during earthmoving and trenching activities.
- Should the project site use change to residential or sensitive receptor use (such as healthcare, childcare, or schools), site soils may require evaluation to determine if there are pesticide- or herbicide-related compounds above applicable regulatory screening levels.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

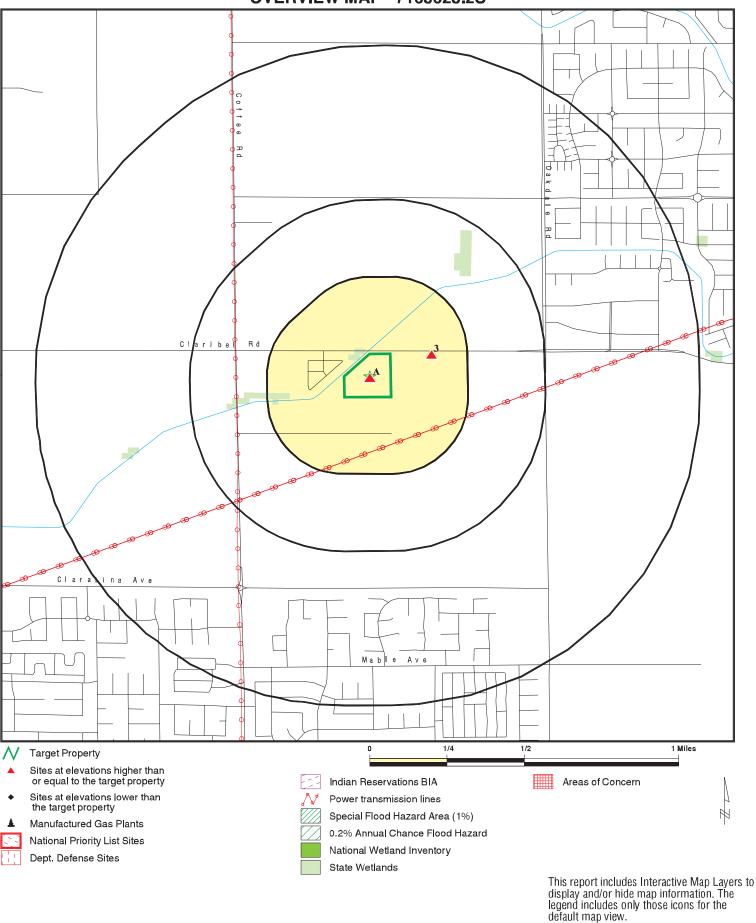

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/20/2022 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

ORPHAN SUMMARY

Count: 1 records.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation
and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database
includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste
as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate
less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 08/15/2022 Date Data Arrived at EDR: 08/17/2022 Date Made Active in Reports: 10/24/2022

Number of Days to Update: 68

Source: Environmental Protection Agency

Telephone: 703-603-0695 Last EDR Contact: 08/17/2022

Next Scheduled EDR Contact: 12/05/2022 Data Release Frequency: Varies

US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 08/15/2022 Date Data Arrived at EDR: 08/17/2022 Date Made Active in Reports: 10/24/2022

Next Scheduled EDR Contact: 02/06/2023 Data Release Frequency: Quarterly

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary

and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

MODESTO 1750 CLARIBEL RD MODESTO, CA 95357

TARGET PROPERTY COORDINATES

Latitude (North): 37.709714 - 37⁴² 34.97" Longitude (West): 120.968694 - 120⁵⁸ 7.30"

Universal Tranverse Mercator: Zone 10 UTM X (Meters): 679057.9 UTM Y (Meters): 4175345.0

Elevation: 112 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 12007935 RIVERBANK, CA

Version Date: 2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

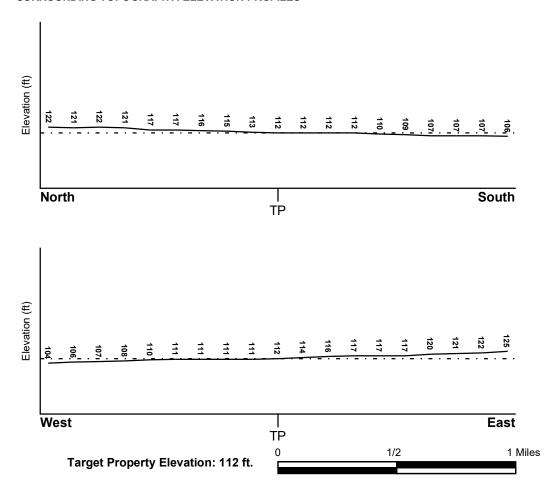

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

06077C0830F FEMA FIRM Flood data

Additional Panels in search area: FEMA Source Type

Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

RIVERBANK YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

 MAP ID
 FROM TP
 GROUNDWATER FLOW

 Not Reported
 GROUNDWATER FLOW

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Hanford

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary		Boundary		Classification		
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	hydraulic conductivity micro m/sec	Oon Noadhon
1	0 inches	11 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1
2	11 inches	59 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1

Soil Map ID: 2

Soil Component Name: Hanford
Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at

least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Site Representative Interview

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user (the person or entity on whose behalf the Phase I Environmental Site Assessment is being conducted) must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The user should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete. The questions are as follows:

ueu	ermination that all appropriate inquiries as not complete. The questions are as follows.
1.	Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?
No	l am not aware.
2.	Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?
No	o I am not aware.
3.	As the user of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
ele	VR is in a similar same line of business as the site as we operate powerplants with ectrical switchgear. DWR does not have specialized knowledge of the chemicals d process used.
4.	If the purchase price of the subject property was below fair market value, did this occur because contamination was/is known or believed to be present at the property?
No	ot Applicable, site is being leased. No contamination is known.

5. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases?

No I am not aware.

a. Do you know the past uses of the property?

The land was previously used as farm land.

b. Do you know of specific chemicals that are present or once were present at the property?

I do not know of the specific chemicals present or once present at the property.

c. Do you know of spills or other chemical releases that have taken place at the property?

I do not know of any spills that have taken place at the property.

d. Do you know of any environmental cleanups that have taken place at the property?

I do not know of any spills that have taken place at the property.

6. As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

There are no obvious indicators that point to a presence or likely presence of contamination at the property.

1. Current Property Uses and Buildings:

The ASTM Standard (E 1527-21, Section 10) for Phase I Environmental Site Assessments requires interviews with past and present owners and occupants of the property in order to obtain information on the history and uses of the property. Please answer the questions below to the best of your knowledge. Please provide additional information for all YES answers.

How long have you owned or occupied the property?
MID has owned the property since 2004
Describe the current uses of the property.
The property is currently vacant
How long has the property been used for these purposes?
Describe any buildings on the property and indicate the years they were constructed.
N/A

2. Past Uses: Describe the past use(s) of the pro	perty and indicate t	he time period for e	ach use, if known.		
MID has no records of past uses since a	acquiring the pro	perty			
3. Previous Owners/Operators: Please identify information (if available).	3. Previous Owners/Operators: Please identify previous owners and operators and provide their contact information (if available).				
Michael Korman					
4. Industrial Uses: Please indicate whether the following industrial uses. Adjoining properties

PROPERTY BACKGROUND INFORMATION QUESTIONNAIRE FOR PROPERTY OWNER/OCCUPANT/REPRESENTATIVE
Have any spills occurred? Yes No Unknown
If yes, please describe:
10. Fill Dirt: Has fill dirt been brought onto the property from an off-site source?
Yes No Unknown
If yes, what was the source of fill dirt?
If yes, was/is there evidence that the fill dirt in may be contaminated?
Yes No Unknown
If yes, please provide soil sampling data, if available, or describe other evidence:
11. Pits, Ponds, and Lagoons: Are there currently any pits, ponds, or lagoons on the property? Yes X No Unknown If yes, please describe:
·

PROPERTY BACKGROUND INFORMATION QUESTIONNAIRE FOR PROPERTY OWNER/OCCUPANT/REPRESENTATIVE				
Have any pits, ponds, or lagoons previously existed on the property? Yes No Unknown If yes, please describe:				
12. Stained Soil: Are there currently any areas on the property with stained soil? Yes No X Unknown If yes, please describe where, the size of stain, if there were odors, etc.:				
Has stained soil previously existed on the property? Yes No Unknown If yes, please describe where, size of stain, if there were odors, etc.:				

13. Storage Tanks: Do underground or aboveground storage tanks exist or have they existed previously on the property? Yes X No Unknown If yes, please provide details below. If tanks previously existed on the property, please describe how						
	they were closed (e.g., removed, abandoned in place).					
	Tank Size	Year Installed	Contents	Closure Method (if applicable)	Year Closed (if applicable)	
14. Fill Pipes/Vent Pipes/Access Ways: Do fill pipes, vent pipes, or access ways indicating the presence of underground storage tanks currently exist on the property? Yes x No Unknown Have fill pipes or vent pipes, which may indicate the presence of an underground storage tank, been removed from the property? Yes x No Unknown						
15. Floor Drains: Are floor drains stained with anything other than water or do they emit foul odors on the property? Yes X No Unknown						
16. Private Well/Non-Public Water Source: Is the property served by a private well or other non-public water source? Yes X No Unknown If yes, please describe source						

PROPERTY OWNER/OCCUPANT/REPRESENTATIVE
Are contaminants known to exist in any private well or non-public water system serving the property? Yes X No Unknown If yes, please describe
17. Wastewater: Does the property discharge wastewater, other than domestic wastewater or stormwater, into the sewer? Yes X No Unknown If yes, please describe
Does a neighboring property discharge wastewater, other than stormwater, onto the property? Yes X No Unknown If yes, please describe
Other than permission for domestic hookup, has any type of permit(s) for wastewater discharge been issued to the property? Yes X No Unknown If yes, please describe
18. Septic Tank: Does a septic tank exist, or has one existed previously at the property? Yes (currently exists) Yes (previously existed, was removed) No Unknown

PROPERTY BACKGROUND INFORMATION QUESTIONNAIRE FOR

19. Cesspools/Cisterns: Do cesspools or cisterns currently exist on the property?
Yes (cesspool) Yes (cistern) No Unknown
Have cesspools or cisterns previously existed on the property?
Yes (cesspool) Yes (cistern) No X Unknown

EDR Inquiry # 7163623.3 Contact: Cheyenne Graves

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by DUDEK were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # EBC7-41B7-B083

PO # 12206.028

Project SRR Energy Sites

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: EBC7-41B7-B083

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

Library of Congress

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Brad street. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.
