2019
Integrated Regional Water Management Grant Program Guidelines

April 2019

California Natural Resources Agency
Department of Water Resources
Division of Integrated Regional Water Management
The 2019 Integrated Regional Water Management (IRWM) Grant Program Guidelines (2019 Guidelines) contain the general process, procedures, and criteria that DWR will use to implement the Proposition 1 (The Water Quality, Supply, and Infrastructure Improvement Act of 2014) IRWM Implementation Grant Program. Additionally, DWR will issue separate Proposal Solicitation Packages (PSP) to provide detailed information on how to apply for specific funding opportunities. The PSPs for specific grant funding opportunities are available at the website listed below.

Grant Program Website
DWR will use the internet as the primary communication tool to notify interested parties of the status of grant solicitations and to convey pertinent information. DWR will post information at the following website: https://www.water.ca.gov/Work-With-Us/Grants-And-Loans/IRWM-Grant-Programs/Proposition-1
See Appendix A for other useful web links and Appendix B for common usage of terms and definitions.

Mailing List
In addition to the above-referenced website, DWR will distribute information via e-mail. If you are not already on the IRWM e-mail distribution list and wish to be placed on it, please visit the following site: https://water.ca.gov/Work-With-Us/Grants-And-Loans/IRWM-Grant-Programs

Contact Information
For questions about the 2019 Guidelines or other issues, please contact DWR’s Financial Assistance Branch at (916) 651-9613 or by e-mail at DWR_IRWM@water.ca.gov.

I. INTRODUCTION AND OVERVIEW

Proposition 1, Chapter 7 Regional Water Security, Climate and Drought Preparedness (Water Code § 79740 – 79748) funding is intended to improve regional water self-reliance security and adapt to the effects on water supply arising out of climate change. Specifically, the purpose is to assist water infrastructure systems adapt to climate change; provide incentives for water agencies throughout each watershed to collaborate in managing the region’s water resources and setting regional priorities for water infrastructure; and improve regional water self-reliance, while reducing reliance on the Sacramento-San Joaquin Delta.

The Integrated Regional Water Management (IRWM) Grant Program is designed to encourage integrated regional strategies for management of water resources by providing funding for projects and programs that support integrated water management. Previous Proposition 1 IRWM solicitations were administered according to the 2016 IRWM Grant Program Guidelines (2016 Guidelines). The 2019 IRWM Grant Program Guidelines (2019 Guidelines) will apply to all future solicitations for grant funding under Proposition 1. However, changes may be necessary due to legislation or changes in State’s water management policy. If changes are necessary, the 2019 IRWM Guidelines will be amended and subject to a public review process per California Water Code (Water Code) §79706(b).

A. Funding

Proposition 1 (Water Code §79744) authorized $510 million in IRWM grant funds that were allocated to the 12 hydrologic region-based Funding Areas, as shown in Figure 1.
Funding Projects in Adjacent Funding Areas

Because Proposition 1 allotted funds by Funding Area, DWR will default to project location in determining how funds are allocated. In some cases, an IRWM region may choose to propose to use grant funds allocated to its Funding Area to perform work in another Funding Area. This is allowable, but the applicant must include in their proposal:

- Clear explanation of how the project contributes directly to the objectives of their IRWM Plan
- Description of the Regional Water Management Group’s (RWMG) efforts to cooperate on planning and implementation
- Description of the level of support for the project from both IRWM regions

B. Funding Opportunities

DWR administers three separate grant programs as described below. Each program has specific requirements and selection processes. Program schedules can be found at the website shown in the Foreword.

- **Disadvantaged Community Involvement Program** – Water Code §79745 directs not less than $51 million, for the purpose of ensuring the involvement of DACs, economically distressed areas (EDA), and underrepresented communities within regions. These funds ($51,687,838) have already been awarded.

- **Planning Grant Program** – A total of $4,199,271 was awarded through a competitive process to support the development of new IRWM Plans or to update existing IRWM Plans. More information on IRWM Plan Standards and related processes are presented in Volume 2 of the 2016 Guidelines.

- **Implementation Grant Program** – Approximately $403 million will be awarded for Implementation programs and projects, of which not less than $51 million will be allocated to projects that directly benefit DACs (Water Code §79742(d)).

C. Minimum Local Cost Share Requirements

An average local cost share of not less than 50% of the total project costs in a proposal is required. Local cost share may include, but is not limited to, federal funds, local funding, or donated services from non-State sources. The local cost share requirement may be waived or reduced for projects that directly benefit a DAC or EDA. Refer to each PSP for more information regarding the applicability of cost share reduction or waivers.

D. Program Preferences and Statewide Priorities

Water Code §79707(b and e) and §79742(a and f) identify various priorities or considerations that shall be given to proposals and are listed below and are collectively referred to as the “Program Preferences.”

- **Leverage Funds** – Give priority to projects that leverage private, federal, or local funding or produce the greatest public benefit.
- **Employ New or Innovative Technology or Practices** – Give special consideration to projects that employ new or innovative technology or practices, including decision support tools that support the integration of multiple jurisdictions, including, but not limited to, water supply, flood control, land use, and sanitation.
- **Implement IRWM Plans with Greater Watershed Coverage** – Give priority to projects in IRWM Plans that cover the greater portion of the watershed.
- **Multiple Benefits** – Give special consideration to projects that achieve multiple benefits.
In addition to the Program Preferences contained in the Water Code, DWR has compiled various statewide priorities that will be utilized for the Proposition 1 IRWM Grant Program. The Statewide Priorities are based on the California Water Action Plan 2016 Update, issued by the California Natural Resources Agency, California Department of Food and Agriculture, and the California Environmental Protection Agency (January 2016). Those Statewide Priorities are shown below in Table 1.

These Program Preferences and Statewide Priorities will be taken into consideration during the review process. Refer to individual PSPs for the specific details regarding the application of the Program Preferences and Statewide Priorities.

### Table 1 – Statewide Priorities

<table>
<thead>
<tr>
<th>Action #</th>
<th>Description</th>
</tr>
</thead>
</table>
| 1. Make Conservation a California Way of Life | • Building on current water conservation efforts and promoting the innovation of new systems for increased water conservation  
• Expand agricultural and urban water conservation and efficiency to exceed SB-X7-7 targets  
• Provide funding for conservation and efficiency  
• Increase water sector energy efficiency and greenhouse gas reduction capacity.  
• Promote local urban conservation ordinances and programs. |
| 2. Increase Regional Self-Reliance and Integrated Water Management Across All Levels of Government | • Ensure water security at the local level, where individual government efforts integrate into one combined regional commitment where the sum becomes greater than any single piece  
• Support and expand funding for Integrated Water Management planning and projects  
• Improve land use and water alignment  
• Provide assistance to disadvantaged communities  
• Encourage State focus on projects with multiple benefits such as flood protection, groundwater recharge, water quality, conjunctive use, etc.  
• Increase the use of recycled water |
| 3. Achieve the Co-Equal Goals for the Delta | • This action is directed towards State and federal agencies; however, consideration will be afforded to eligible local or regional projects that also support achieving the co-equal goals providing a more reliable water supply for California and to protect, restore, and enhance the Delta ecosystem |
| 4. Protect and Restore Important Ecosystems | • Continue protecting and restoring the resiliency of our ecosystems to support fish and wildlife populations, improve water quality, and restore natural system functions  
• Restore key mountain meadow habitat  
• Manage headwaters for multiple benefits  
• Protect key habitat of the Salton Sea through local partnership  
• Restore coastal watersheds  
• Continue restoration efforts in the Lake Tahoe Basin  
• Continue restoration efforts in the Klamath Basin  
• Water for wetlands and waterfowl  
• Eliminate barriers to fish migration  
• Assess fish passage at large dams  
• Enhance water flows in stream systems statewide |
| 5. Manage and Prepare for Dry Periods | • Effectively manage water resources through all hydrologic conditions to reduce impacts of shortages and lessen costs of state response actions. Secure more reliable water supplies and consequently improve drought preparedness and make California’s water system more resilient.  
• Revise operations to respond to extreme conditions  
• Encourage healthy soils |
Table 1 – Statewide Priorities

<table>
<thead>
<tr>
<th>Action #</th>
<th>Description</th>
</tr>
</thead>
</table>
| 6. Expand Water Storage Capacity and Improve Groundwater Management | ✷ Increase water storage for widespread public and environmental benefits, especially in increasingly dry years and better manage our groundwater to reduce overdraft  
✦ Provide essential data to enable Sustainable Groundwater Management  
✦ Support funding partnerships for storage projects  
✦ Improve Sustainable Groundwater Management  
✦ Support distributed groundwater storage  
✦ Increase statewide groundwater recharge  
✦ Accelerate clean-up of contaminated groundwater and prevent future contamination |
| 7. Provide Safe Water for All Communities | ✷ Provide all Californians the right to safe, clean, affordable and accessible water adequate for human consumption, cooking, and sanitary purposes  
✦ Consolidate water quality programs  
✦ Provide funding assistance for vulnerable communities  
✦ Manage the supply status of community water systems  
✦ Additionally, as required by Water Code §10545, in areas that have nitrate, arsenic, perchlorate, or hexavalent chromium contamination, consideration will be given to grant proposals that included projects that help address the impacts caused by nitrate, arsenic, perchlorate, or hexavalent chromium contamination, including projects that provide safe drinking water to small disadvantaged communities. |
| 8. Increase Flood Protection | ✷ Collaboratively plan for integrated flood and water management systems, and implement flood projects that protect public safety, increase water supply reliability, conserve farmlands, and restore ecosystems  
✦ Improve access to emergency funds  
✦ Better coordinate flood response operations  
✦ Prioritize funding to reduce flood risk and improve flood response  
✦ Encourage flood projects that plan for climate change and achieve multiple benefits |
| 9. Increase Operational and Regulatory Efficiency | ✷ This action is directed towards State and federal agencies; however, consideration will be afforded to eligible local or regional projects that also support increased operational of the State Water Project or Central Valley Project |
| 10. Identify Sustainable and Integrated Financing Opportunities | ✷ This action is directed towards State agencies and the legislature |

E. Grant Award Process

IRWM grants will be awarded using specific criteria contained in the individual PSPs.

If there are multiple IRWM regions in a Funding Area, those IRWM regions are competing for the funding allocated to that Funding Area. DWR will make funding decisions based on application scores within a Funding Area, as described in Section IV below. To ensure wise investments of State general obligation bond funds, minimum scores for various criteria may be established to ensure that quality proposals are awarded funding.
II. **ELIGIBILITY REQUIREMENTS**

### A. Eligible Grant Applicants

Water Code §79712 identifies the following entities as eligible grant applicants:
- Public agencies
- Non-profit organizations
- Public utilities
- Federally recognized Indian Tribes
- State Indian Tribes listed on the Native American Heritage Commission’s Tribal Consultation list
- Mutual water companies

See Appendix B for definitions of these terms.

To be part of the proposal as a project proponent and access grant funding through their relationship with the applicant, Local Project Sponsors must meet the definition of Eligible Grant Applicant as described above. Note that if the applicant is found ineligible, the entire application will be considered ineligible. If the project proponent is found ineligible, funding cannot be awarded to that project and the grant award will be proportionately reduced.

### B. Eligibility Criteria

This is a general list of eligibility criteria for IRWM grant funding opportunities. Refer to the individual PSPs for specific eligibility criteria requirements and information that must be included in an application to establish eligibility.

**The IRWM region must have been accepted into the IRWM Grant Program through the Region Acceptance Process (RAP)** – If an IRWM region has previously gone through the RAP and any boundary changes have been accepted by DWR, no further action is required. If the IRWM region is new and has not been through the RAP process or is changing its boundary, Volume 2, Section VI of the 2016 Guidelines contains the information needed to comply with this criterion. IRWM regions need to address this criterion prior to the close date of a grant solicitation to which they are applying. Previous RAP decisions are located at: [https://water.ca.gov/Work-With-Us/Grants-And-Loans/IRWM-Grant-Programs/Region-Acceptance-Process](https://water.ca.gov/Work-With-Us/Grants-And-Loans/IRWM-Grant-Programs/Region-Acceptance-Process)

**Projects included in IRWM Plan** – Projects must be included in an adopted IRWM Plan that is consistent with the 2016 IRWM plan standards. The applicant must demonstrate that the project is listed in the IRWM Plan project list.

**Each proponent of a project included in an IRWM Implementation proposal must adopt the IRWM Plan** – Each individual agency proposing a project(s) must adopt the IRWM Plan. Regional Water Management Groups will not be allowed to adopt an IRWM Plan on behalf of their member agencies.

**Public Utilities and Mutual Water Companies** – A project proposed by a public utility that is regulated by the Public Utilities Commission or a mutual water company shall have a clear and definite public purpose and shall benefit the customers of the water system and not the investors (Water Code §79712(b)(1)).

**Water Contamination** – Water Code §10541(e)(14) requires IRWM Plans in regions with areas of nitrate, arsenic, perchlorate, or hexavalent chromium contamination to include a description of each of the following:
- The location and extent of that contamination in the region,
- The impacts caused by the contamination to communities within the region,
Existing efforts being undertaken in the region to address the impacts, and
Any additional efforts needed to address the impacts.

Additionally, Water Code §10544.5 requires the RWMG, in areas that have nitrate, arsenic, perchlorate, or hexavalent chromium contamination, to include in the grant application information regarding how a project or projects in the application help to address the contamination or an explanation why the application does not include that kind of project or projects.

**Climate Change** – Applicants seeking funding shall demonstrate that the IRWM Plan the applicant’s project implements contributes to addressing the risks in the region to water supply and water infrastructure arising from climate change (Water Code §79742(e)).

**Groundwater Management Compliance** – A local agency that does not prepare, adopt, and submit its groundwater [management] plan in accordance with groundwater planning requirements established under Division 6 of the Water Code (Water Code §10000 et seq.) is ineligible to apply for grant funds until the plan is prepared and submitted in accordance the requirements of Division 6 of the Water Code. The groundwater management plan (GWMP) requirement shall not apply to a water replenishment district formed pursuant to Water Code section 60000 et seq., or to a local agency that serves or has authority to manage an adjudicated groundwater basin (Water Code §79742(b)).

The recent passage of the Sustainable Groundwater Management Act (SGMA) (Water Code §10720 et seq.) changes grant eligibility related to groundwater management compliance. Various SGMA requirements become effective over time. Applicants will need to maintain continuing eligibility with the most current SGMA requirements as they come into effect. Applicants with groundwater projects must follow specific instructions contained in each PSP on what to submit for groundwater management eligibility as SGMA is implemented.

- **SGMA** – SGMA (Water Code §10720 et seq.) specifies actions for critically over-drafted groundwater basins, high and medium priority basins, and low and very low priority basins. Groundwater project proponents must demonstrate how their project is consistent with SGMA efforts in the basin.

- **Groundwater Management Plan Compliance** – The applicant, or the project proponent responsible, must meet one of the following conditions (Water Code §10753.7 (b)(1)):
  - Conform to the requirements of an adjudication of water rights in the subject groundwater basin.
  - For projects in a high or medium priority basin, as designated by DWR, a GWMP that complies with Water Code §10753.7 must be prepared, implemented, and have been adopted before January 1, 2015. If the GWMP was not by adopted after January 1, 2015, then the project(s) is(are) not eligible to receive funding (Water Code §10750.1(a)). However, this does not apply to a plan submitted as an alternative pursuant to Water Code §10733.6, unless DWR has not determined that the alternative satisfies the objectives of Part 2.74 (commencing with Section 10720) on or before January 31, 2020, or DWR later determines that the plan does not satisfy the objectives (Water Code §10750.1(c)).
  - Participate or consent to be subject to a GWMP, basin-wide management plan, or other IRWM program or plan that meets the requirements of Water Code §10753.7.
  - For projects located in low or very low priority groundwater basins, as designated by DWR, without an existing GWMP, the applicant or local project sponsor must commit to adopting a GWMP that meets the requirements of Water Code §10753.7 or a GSP that meets the requirements of Water Code § 10727 et seq. within one-year of the grant application submittal date.

**California Statewide Groundwater Elevation Monitoring (CASGEM) Compliance**– Water Code §10920 et seq. establishes a groundwater monitoring program designed to monitor and report groundwater elevations in all or part of a basin or sub-basin. Information on the requirements of the CASGEM Program can be found at the link listed in Appendix A. DWR has established high, medium, low, and very low priority groundwater basins, as well as CASGEM monitoring entities. For those high
and medium priority basins that do not have a CASGEM monitoring entity, a grant applicant and/or Local Project Sponsor that match the list of potential monitoring entities identified in Water Code §10927, along with counties whose jurisdictions include unmonitored high and medium priority basins, will not be eligible for grant funding pursuant to Water Code §10933.7(a). Consistent with Water Code §10933.7(b), if the entire service area of the grant applicant or the individual project proponent is demonstrated to be a DAC, as defined in Appendix B, the project will be considered eligible for grant funding notwithstanding CASGEM compliance.

**Stormwater Resource Plans** – Water Code §10563(c) requires the development of a stormwater resource plan and compliance with these provisions to receive grants for stormwater and dry weather runoff capture projects. This requirement does not apply to DACs with a population of 20,000 or less and that is not a co-permittee for a municipal separate stormwater system national pollutant discharge elimination system permit issued to a municipality with a population greater than 20,000 (Water Code § 10563(c)).

**Urban and Agricultural Water Suppliers Compliance** – To be eligible for grant funding under this program:

- Urban water suppliers must have a current Urban Water Management Plan that has been reviewed by DWR and found to have addressed the requirements of the Urban Water Management Planning Act (Water Code Division 6, Part 2.6, §10610 et seq.).
- Agricultural water suppliers must have a current Agricultural Water Management Plan that has been reviewed by DWR and found to have addressed the requirements of the Agricultural Water Management Planning Act (Water Code Division 6, Part 2.8, § 10800 et seq.).
- Agricultural and urban water suppliers must comply with the conservation and water use efficiency measures of Water Code, Division 6, Part 2.55 (Water Code §10608 et seq.), Sustainable Water Use and Demand Reduction, and associated regulations.

**Water Metering Compliance** – Any urban water supplier applying for State grant funds for wastewater treatment projects, water use efficiency projects, drinking water treatment projects, or for a permit for a new or expanded water supply, shall demonstrate that they meet the water meter requirements in Water Code §525 et seq.

**Surface Water Diversion Reporting Compliance** – A diverter of surface water is not eligible for a water grant or loan awarded or administered by the State unless it complies with surface water diversion reporting requirements outlined in Water Code, Division 2, Part 5.1 (Water Code §5100 et seq.).

**Open and Transparent Water Data** - Recipients of state funds through grants or contracts for research or projects relating to the improvement of water or ecological data shall, as a condition of the receipt of a grant or contract, adhere to the protocols developed pursuant to subdivision (a) for data sharing, transparency, documentation, and quality control (Water Code §12406(b)).

**C. Eligible Project Types**

Subject to regional priorities, projects may include, but are not limited to, the following (Water Code §79743(a - j)):

- Water reuse and recycling for non-potable reuse and direct and indirect potable reuse
- Water-use efficiency and water conservation
- Local and regional surface and underground water storage, including groundwater aquifer cleanup or recharge projects
- Regional water conveyance facilities that improve integration of separate water systems
- Watershed protection, restoration, and management projects, including projects that reduce the risk of wildfire or improve water supply reliability
- Stormwater resource management, including, but not limited to, the following:
• Projects to reduce, manage, treat, or capture rainwater or stormwater
• Projects that provide multiple benefits such as water quality, water supply, flood control, or open space
• Decision support tools that evaluate the benefits and costs of multi-benefit stormwater projects
• Projects to implement a stormwater resource plan developed in accordance with Part 2.3 (commencing with Section 10560) of Division 6 including Water Code §10562(b)(7)
• Conjunctive use of surface and groundwater storage facilities
• Water desalination projects
• Decision support tools to model regional water management strategies to account for climate change and other changes in regional demand and supply projections
• Improvement of water quality, including drinking water treatment and distribution, groundwater and aquifer remediation, matching water quality to water use, wastewater treatment, water pollution prevention, and management of urban and agricultural runoff
• Regional projects or programs as defined by the IRWM Planning Act (Water Code §10537), see Appendix B

Eligible proposals must do the following. The following requirements may be applied at the project level depending on the individual PSP:

• Advance the purpose of Proposition 1 Chapter 7, Regional Water Security, Climate, and Drought Preparedness (Water Code §79707(c) and §79740) which are, as follows:
  • Assist water infrastructure systems adapt to climate change
  • Provide incentives for water agencies throughout each watershed to collaborate in managing the region’s water resources and setting regional priorities for water infrastructure
  • Improve regional water self-reliance, while reducing reliance on the Sacramento-San Joaquin Delta.

Eligible projects must:

• Be consistent with Water Code Division 7 (Water Code §13000 et seq.) and Section 13100 of the Government Code (Infrastructure Plan) (Water Code §79707(h))
• Promote State planning priorities and sustainable community strategies, consistent with Government Code §65041.1 and §65080 (Water Code §79707(j))
• Wherever possible, preserve California’s working agricultural and forested landscapes (Water Code §79707 (j))
• Be included in a Stormwater Resource Plan that has been incorporated into an IRWM plan, unless exempt per Water Code §10563(c)(2)(B). (Applies only to stormwater and dry weather runoff capture projects.)
• Be supported by the local Groundwater Sustainability Agency. (Applies only to projects that affect Groundwater levels.)

Proposition 1 funds cannot be used for the following actions:

• Any project that could adversely impact a wild and scenic river or any river afforded protection under the California or Federal Wild and Scenic Rivers Act (Water Code §79711(e))
• Acquisition of land through eminent domain (Water Code §79711(g))
• Design, construction, operation, mitigation, or maintenance of Delta conveyance facilities (Water Code §79710(a))
• Acquisition of water except for projects that will provide fisheries or ecosystem benefits or improvements that are greater than required applicable environmental mitigation measures or compliance obligations in effect at the time the funds are made available. Such funds shall not be credited to any measures or obligations, except for any water transfers for the benefit of §3406(d) of the Central Valley Project Improvement Act (Title 34 of Public Law 102-575) (Water Code §79709(c)).

The PSP for a specific solicitation may also provide clarifications on the specific project eligibility requirements.
III. **General Program Requirements**

A. Conflict of Interest

All participants are subject to State and federal conflict of interest laws. Failure to comply with these laws, including business and financial disclosure provisions, will result in the application being rejected and any subsequent grant agreement being declared void. Other legal action may also be taken. Before submitting an application, applicants are urged to seek legal counsel regarding conflict of interest requirements. Applicable statutes include, but are not limited to, Government Code §1090 and Public Resources Code §10410 and §10411.

B. Confidentiality

Once the application has been submitted to DWR, any privacy rights, as well as other confidentiality protections afforded by law with respect to the application package will be waived.

C. Labor Code Compliance

Grant recipients are bound by all the provisions of the Labor Code regarding prevailing wages and shall monitor all contracts subject to reimbursement from this Agreement to assure that the prevailing wage provisions of the Labor Code are being met. The applicant must comply with all applicable laws when it hires private consultants to implement its project partially or fully.

Tribal governments may have other labor compliance requirements or obligations depending on their federally recognized or non-federally recognized status; Tribes are encouraged to consult their legal counsel and the Department of Industrial Relations (DIR) to determine their specific labor compliance obligations.

For additional information on Labor Code compliance, please refer to the DIR link listed in Appendix A. Before submitting an application, applicants are urged to seek legal counsel regarding California Labor Code compliance.

D. CEQA Compliance

Activities funded under the IRWM Grant Program regardless of funding source must comply with the California Environmental Quality Act (CEQA) (Public Resources Code §21000 et seq.). Public Resources Code §21080.3.1 requires the CEQA lead agency to consider project effects on Tribal cultural resources and to conduct consultation with California Native American Tribes. Appendix C contains additional information on Tribal notification.

E. Monitoring Requirements

Water quality monitoring data shall be collected and reported to the SWRCB in a manner that is compatible and consistent with surface water monitoring data systems or groundwater monitoring data systems administered by the SWRCB (Water Code §79704). See Appendix A for web links to California Environmental Data Exchange Network and the Groundwater Ambient Monitoring and Assessment Program (Water Code §79704).

Projects that collect watershed monitoring data shall collect and report the data in a manner consistent with the Department of Conservation’s statewide watershed monitoring program (Water Code §79704).
Water Code §10927 requires various entities, including local agencies that are managing all or part of a groundwater basin pursuant to Water Code §10750, to assume responsibilities for groundwater elevation monitoring and reporting, as required by Water Code §10920 et seq. Appendix A provides a link to the CASGEM program website which provides useful information on the CASGEM requirement.

F. Signage or Acknowledgement of Credit

To the extent practicable, a project supported by funds made available through this program will include signage or other relevant forms of acknowledgement informing the public that the project received funds from the Water Quality, Supply, and Infrastructure Improvement Act of 2014 (Water Code §79707(g)).

G. Tribal Status

The Department of Water Resources acknowledges federally recognized Tribes are protected by the doctrine of sovereign immunity. Further, the Department acknowledges that there are several types of Tribal land ownership, such as the following:

1. Land that is owned by or subject to an ownership of possessory interest of the Tribe;
2. Land that is “Indian Lands” of the Tribe, as that term is defined by 25 U.S.C. section 81(a)(1); or
3. Land that is owned by a tribal entity, or Tribe, within the external border of such Indian lands

If a Tribe is awarded grant funding, DWR will consult with the Tribe on a government to government basis prior to the execution of a grant agreement.

H. California Conservation Corps

Pursuant to Water Code §79714(c) grantees are encouraged to utilize the California Conservation Corps to implement projects funded under this program, where feasible.

IV. PROPOSAL SELECTION AND AWARD PROCESS

This section describes the proposal selection and award process for the Implementation Grant Program.

A. Application Submittal and Review

The PSPs provide detailed instructions on the mechanics of submitting applications and specific information on submittal requirements. PSPs will be made available on the DWR website listed in the Foreword. A notice will be emailed to all interested parties on the IRWM Grant Program mailing list and posted on the website listed in the Foreword.

Submission of applications will be through DWR’s Grant Review and Tracking System (GRanTS). Applicants will be required to submit a new application for each funding opportunity. DWR will only consider applications in response to a specific solicitation.

Each application will be evaluated for completeness and eligibility, in accordance with the PSP. Applications deemed incomplete and/or ineligible may not be evaluated.

All complete and eligible applications will be reviewed and evaluated by DWR based on the criteria and process described in the individual PSPs. DWR may request technical review services from the SWRCB or other agencies, based on technical elements of the proposals.
B. Applicant Assistance Workshops

Informational workshops may be conducted to address applicant questions and to provide general assistance to applicants preparing applications. The dates and locations of the workshops will be provided via the IRWM Grant Program website, email distribution list, and news release(s). In addition to these informational workshops, applicants are encouraged to contact DWR staff with any questions regarding the IRWM Grant Program.

C. Applicant Notification and Public Meeting

The recommended funding list will be posted on DWR’s website for a minimum of 15 calendar days and may be presented at a public meeting held by DWR to solicit public comments on the proposed funding recommendations. Interested parties will be notified of the recommended funding list and any public meeting by email and informing the public of the date, time, and location of the meeting and by a notice placed on the DWR website listed in the Foreword.

D. Final Awards

Based on the application evaluations, and the recommendation of the selection panel, DWR’s Director will approve the release of the grant Final Awards. Final Awards will be posted on DWR’s website and announced by e-mail. Following approval by the Director, the selected grant recipients will receive an award notification letter officially notifying them of their selection, the grant amount, and associated conditions and requirements.

E. Grant Agreement Execution

Following award notification, DWR will execute a grant agreement with the grant recipient. Grant agreements are not executed until signed by the authorized representative of the grant recipient and DWR. Grant agreements for Proposition 1 funds will be executed with one grant recipient (the grant applicant) per application. For proposals with more than one project, the Grantee will then provide funding to the Local Project Sponsors that are responsible for implementation of the component projects.

DWR may require the CEQA process to be complete for any or all projects (if applicable) at the time of application or anytime thereafter as specified by DWR in the individual PSP. If applicable, the Grantee must demonstrate that it has a plan to comply with all applicable requirements of CEQA and the National Environmental Policy Act (NEPA) and a schedule that outlines when the appropriate environmental documents will be completed. DWR staff will review the CEQA documentation available at the time of the grant agreement execution for each project contained within the proposal. Each project with work subject to CEQA shall not proceed until documents that satisfy the CEQA process are received by DWR and DWR has completed its CEQA compliance review. Work that is subject to a CEQA document shall not proceed until and unless approved by DWR. Such approval is fully discretionary and shall constitute a condition precedent to any work for which it is required. Once CEQA documentation has been completed, DWR will consider the environmental documents and decide whether to continue to fund the project or to require changes, alterations, or other mitigation.

As part of the grant agreement, grant recipients and associated Local Project Sponsors will be required to provide information regarding their projects for Bond Accountability reporting. Financial statements may be required prior to execution of a grant agreement. The Grantee may be required to provide audited financial statements for each agency or organization proposed to receive grant funding.

Applicants are strongly encouraged to review existing agreement templates for an understanding of responsibilities for the grant recipient and Local Project Sponsors prior to submitting an application. Appendix D provides a summary of the minimum documents/records that will need to be maintained for State auditing purposes.
F. Eligible Costs and Payment

Costs incurred by grant recipients must meet the “reimbursable costs” definition contained in Appendix B to be eligible to be considered for grant share. Costs incurred by grant recipients must meet the “local cost share” definition in Appendix B to be eligible to be considered for local cost share. Additionally, these costs must be incurred between the effective dates listed in the PSP and termination date of the grant agreement. Refer to the PSP for additional guidance regarding travel costs.

Reimbursement

DWR’s standard method of payment is reimbursement in arrears. Funds are dispersed after DWR approves the submittal of the DWR invoice form and required back-up documentation by the Grantee.

Advanced Payment

Water Code §10551 authorizes advanced payment by DWR for certain grant-funded projects included in an IRWM Plan. See Appendix G for more detail regarding advanced funding.

APPENDIX B – DEFINITIONS

Acquisition – obtaining an interest in real property including, easements, leases, water, water rights, or interest in water obtained for the purposes of instream flows and development rights.

Adopted IRWM Plan – an IRWM Plan that has been formally accepted, as evidenced by a resolution or other written documentation by the governing bodies of each agency that is part of the RWMG responsible for the development of the Plan and have responsibility for implementation of the Plan. Adoption of an IRWM Plan must follow the notification process in Water Code §10543.

Advanced Payment – is available for certain projects meeting the criteria specified in Water Code §10551. See Appendix G for more information. Advanced payment is only available for eligible reimbursable costs (see reimbursable costs definition below).

Agricultural Water Supplier – a water supplier, either publicly or privately owned, that provides water to 10,000 or more irrigated acres, excluding the acreage that receives recycled water; also includes a supplier or contractor for water, regardless of the basis of right, that distributes or sells water for ultimate resale to customers (Water Code §10608.12(a)).

Applicant – the entity that is formally submitting a grant application. This is the same entity that would enter into an agreement with the State should the grant application be funded. The grant applicant must be a public agency, non-profit organization, public utility, federally recognized Indian Tribe, state Indian Tribe listed on the Native American Heritage Commission’s Tribal Consultation list, or a mutual water company (Water Code §79712(a-b)).

Application – the electronic or hard copy submission to DWR that requests grant funding for a proposal that the applicant intends to implement.

Basin Plan – also referred to as Regional Water Quality Control Plan, identifies: 1) beneficial uses to be protected; 2) water quality objectives for their reasonable protection of beneficial uses; and 3) a program of implementation for achieving the water quality objectives as established by the RWQCBs or SWRCB (Water Code §13050(j)).

Beneficial Uses – the uses of streams, lakes, rivers, and other water bodies to humans and other life. Beneficial uses are outlined in a Regional Water Quality Control Plan (Basin Plan). (See also Water Code §13050(f).)

California Native American Tribe – all Indigenous Communities of California, which are on the contact list maintained by the Native American Heritage Commission, including those that are federally non-recognized and federally recognized, and those with allotment lands, regardless of whether they own those lands. Additionally, because some water bodies and Tribal boundaries cross State borders, this term may include Indigenous Communities in Oregon, Nevada, and Arizona that are impacted by water in California.

Disadvantaged Community – a community with an annual median household income that is less than 80 percent of the Statewide annual median household income (Water Code §79702(j) which refers to Water Code §79505.5).

Economically Distressed Area – a municipality with a population of 20,000 persons or less, a rural county, or a reasonably isolated and divisible segment of a larger municipality where the segment of the population is 20,000 persons or less, with an annual median household income that is less than 85 percent of the statewide median household income, and with one or more of the following conditions as determined by the department: (1) financial hardship, (2) unemployment rate at least 2 percent higher than the statewide average, or (3) low population density. (Water Code §79702. (k)).

Eligible Involvement Activities – activities that benefit DACs and meet the intended outcome(s) of the DAC Involvement Program. Please reference the DAC Involvement Program RFP for additional information.
Environmental Justice – the fair treatment of people of all races, cultures, and incomes with respect to the development, adoption, implementation, and enforcement of environmental laws, regulations, and policies (Government Code §65040.12(e)).

Grantee – a grant recipient.

Grant Administration – work or other activities performed by the Grantee or Local Project Sponsor including, but not limited to, activities associated with administering the grant, submitting progress reports, invoice processing, coordinating with DWR’s Financial Assistance Branch, and other like work required for the successful execution, managing, processing, and closing of a Grant Agreement.

In-Kind Services – work performed by the Grantee that furthers the scope of the grant, the cost of which is considered local cost share in-lieu of actual funds from the Grantee.

IRWM Plan – a comprehensive plan for a defined geographic area, the specific development, content, and adoption of which shall satisfy requirements developed pursuant to this part. At a minimum, an Integrated Regional Water Management Plan describes the major water-related objectives and conflicts within a region, considers a broad variety of resource management strategies, identifies the appropriate mix of water demand and supply management alternatives, water quality protections, and environmental stewardship actions to provide long-term, reliable, and high-quality water supply and protect the environment, and identifies disadvantaged communities in the region and takes the water-related needs of those communities into consideration. (Water Code §10530 et seq., in particular §10534)

Local Cost Share – non-State fund portion of cost share made available by the applicant to assist in financing a project which can include in-kind-services directly related to the scope of work presented in the grant proposal. Generally, local cost share expenses must meet reimbursable cost requirements (defined below).

Local cost share may also include:

- expenses, including in-kind services, incurred by a State agency, as long as the expenses are not otherwise funded by State funds.
- costs associated with development of Proposition 1, IRWM Implementation grant applications and participation in required pre-application workshops for projects that ultimately receive Proposition 1 IRWM Implementation grant funding.

State Revolving Funds and American Recovery and Reinvestment Act funds are not considered State funds and may be used as local cost share.

Long-term – means for a period of not less than 20 years.

Mutual Water Company – a private corporation or association organized for the purposes of delivering water to its stockholders and members at cost, including use of works for conserving, treating, and reclaiming water (Public Utilities Code §2725-2729).

Non-profit Organization – any non-profit corporation qualified to do business in California and qualified under United States Code, title 26, §501(c)(3). (Water Code §79702(p))

Physical Benefits – measures of project accomplishments (expressed as numeric targets) such as amount of water supply, change in water quality, area, and types of properties protected by flood control features, habitat measured in acreage or flow, energy production or savings, recreation facilities, etc.

Program Preferences – components of a proposal that the State will give preference to, as defined in Water Code §79707 and §79742.

Proposal – the suite of projects that is submitted in an IRWM implementation grant application.

**Public Agency** – any state agency or department, special district, joint powers authority, city, county, city and county, or other political subdivision of the State. (Water Code §79702(s))

**Public Utility** – as defined in Public Utilities Code §216.

**Regional Project or Program** – projects or programs identified in an IRWM Plan that accomplish any of the following (Water Code §10537):

a. Reduce water demand through agricultural and urban water use efficiency.

b. Increase water supplies for any beneficial use through the use of any of the following or other means:
   1. Groundwater storage and conjunctive water management
   2. Desalination
   3. Precipitation enhancement
   4. Water recycling
   5. Regional and local surface storage
   6. Water-use efficiency
   7. Stormwater management

c. Improve operational efficiency and water supply reliability, including conveyance facilities, system reoperation, and water transfers.

d. Improve water quality, including drinking water treatment and distribution, groundwater and aquifer remediation, matching water quality to water use, wastewater treatment, water pollution prevention, and management of urban and agricultural runoff.

e. Improve resource stewardship, including agricultural lands stewardship, ecosystem restoration, flood plain management, recharge area protection, urban land use management, groundwater management, water-dependent recreation, fishery restoration, including fish passage improvement, and watershed management.

f. Improve flood management through structural and nonstructural means, or by any other means.

**Regional Water Management Group** – or RWMG means a group in which three or more local agencies, at least two of which have a statutory authority over water supply or water management, as well as those persons who may be necessary for the development and implementation of an IRWM Plan that meets the requirements in Water Code §10540 and §10541.

**Reimbursable Costs** – costs that may be repaid by state grant. Reimbursable costs may include the reasonable costs of engineering, design, land and easement, legal fees, preparation of environmental documentation, environmental mitigation, and project implementation including directly related administrative costs.

Costs that are not reimbursable with grant funding include, but are not limited to:

a. Costs for preparing and filing a grant application

b. Operation and maintenance costs, including post construction project performance and monitoring costs

c. Purchase of equipment not an integral part of the project

d. Establishing a reserve fund

e. Purchase of water supplies with the exception of Water Code §79709(c)

f. Replacement of existing funding sources for ongoing programs

g. Support of existing punitive regulatory agency requirements and/or mandates in response to negligent behavior

h. Purchase of land in excess of the minimum required acreage necessary to operate as an integral part of the project, as set forth and detailed by engineering and feasibility studies or acquisition of land by eminent domain

i. Indirect Costs, except those that are directly assignable to the grant (documented and proportionately assessed) Examples of Indirect Costs include, but are not limited to: central service costs; general administration of the Grantee or Local Project Sponsors (LPS); non-
project-specific accounting and personnel services performed within the Grantee or LPS’ organizations; depreciation or use allowances on buildings and equipment; the costs of operating and maintaining non-project-specific facilities; tuition and conference fees; and, generic overhead or markup. This prohibition applies to the Grantee, LPSs, and any subcontract or sub-agreement for work completed pursuant to the funding agreement executed with the State.

j. Mitigation for environmental impacts not resulting from implementation of the project funded by this program

**Scoring Criteria** – set of requirements used by DWR to evaluate a proposal for a given program or for funding.

**Small Disadvantaged Community** – for the purposes of Water Code §10545, a small disadvantaged community shall mean a Disadvantaged Community (Water Code 79702(j)) that also has a yearlong population of no more than 10,000 persons.

**Stakeholder** – an individual, group, coalition, agency, or others who are involved in, affected by, or have an interest in the implementation of a specific program or project.

**Urban Water Supplier** – supplier, either publicly or privately owned, that provides water for municipal purposes, either directly or indirectly, to more than 3,000 customers or supplying more than 3,000 acre-feet of water annually (Water Code §10617).
APPENDIX C – NATIVE AMERICAN TRIBE NOTIFICATION

In 2014, the legislature added new requirements regarding Tribal cultural resources in AB 52 (Stats. 2014, ch. 532). Public Resources Code §21080.3.1 requires the CEQA lead agency to consider project effects on Tribal cultural resources and to conduct consultation with California Native American Tribes. Before releasing an Environmental Impact Report, Negative Declaration or Mitigated Negative Declaration, lead agencies must give notice to California Native American Tribes that have submitted a written request for notice and that are traditionally and culturally affiliated with the geographic area of the project.

Additional information on Tribal consultation and AB 52 can be found at the links in Appendix A, which includes an example Tribal Consultation Policy that was adopted by the Karuk Tribe and an example Tribal Consultation Ordinance enacted by the Rincon Band of Luiseno Indians, along with guidance from the Office of Planning and Research.

Contact information for the NAHC is as follows:

   Fax: (916) 373-5471
   nahc@nahc.ca.gov
   http://www.nahc.ca.gov/
APPENDIX D — GUIDELINES FOR GRANTEES

The list below details the documents/records that State Auditors would need to review in the event of a grant being audited. Grantees should ensure that such records are maintained for each funded project for a minimum of three years after termination of the grant agreement.

Internal Controls
1) Organization chart (e.g. Agency’s overall organization chart and organization chart for the grant funded program/project)
2) Written internal procedures and flowcharts for the following:
   a) Receipts, deposits, and disbursements
   b) State reimbursement requests
   c) Grant expenditure tracking
   d) Guidelines, policy, and procedures on grant funded program/project
3) Audit reports of the Agency’s internal control structure and/or financial statements within the last three years
4) Prior audit reports on grant funded program/project

Grants
1) Original grant agreement, any amendment(s) and budget modification documents
2) A listing of all bond-funded grants received from the State
3) A listing of all other funding sources for each Program/Project

Contracts
1) All subcontractor and consultant contracts and related or partners documents, if applicable
2) Contracts between the Agency and member agencies as related to the grant funded program/project

Invoices
1) Invoices from vendors and subcontractors for expenditures submitted to the State for payments under the grant
2) Documentation linking subcontractor invoices to State reimbursement, requests and related grant budget line items
3) Reimbursement requests submitted to the State for the grant

Cash Documents
1) Receipts (copies of warrants) showing payments received from the State
2) Deposit slips (or bank statements) showing deposit of the payments received from the State
3) Cancelled checks or disbursement documents showing payments made to vendors, subcontractors, consultants, and/or agents under the grant
4) Bank statements showing the deposit of the receipts

Accounting Records
1) Ledgers showing entries for grant receipts and cash disbursements
2) Ledgers showing receipts and cash disbursement entries of other funding sources
3) Bridging documents that tie the general ledger to requests for grant reimbursement

Administration Costs
1) Supporting documents showing the calculation of administration costs

Personnel
1) List of all contractors and Agency staff that worked on the grant funded program/project
2) Payroll records including timesheets for contractor staff and the Agency personnel who provided services charged to the program

Project Files
1) All supporting documentation maintained in the project files
2) All grant related correspondence
APPENDIX E – DISADVANTAGED COMMUNITIES

Proposition 1 allows for the continued use of the Disadvantaged Community (DAC) definition as set forth in Water Code §79505.5(a). “Disadvantaged community” means a community with an annual median household income that is less than 80 percent of the statewide annual median household income.

The American Community Survey (ACS) of the U. S. Census provides a dataset than can be used as a source to estimate a community’s Median Household Income (MHI). At the time of publication of these guidelines the most recent and most comprehensive data available is for the 5-year period of 2012-2016. The ACS data estimates MHI for different census geographies, such as for states, counties, census places (incorporated cities and unincorporated towns), census tracts, and census block groups. ACS data is updated on a regular basis. For the most current data and maximum allowable MHI to qualify as a DAC at the time of application for any specific grant program, see the individual grant program PSP. For additional information on the ACS see the link listed in Appendix A.

DWR has developed a tool which utilizes the most current ACS data to show the location and boundaries of DACs in the State, at the census place, tract, block group level, and other information. The tool allows users to view different geographies or combinations of geographies, using different base maps and to zoom in to various scales. For individuals with GIS capabilities GIS files representing the ACS data (and DAC status) for the three census geographies can also be found at the DAC mapping tool website. The DAC mapping tool can be found at the following link: https://gis.water.ca.gov/app/dacs/

DWR will update the MHI values and the DAC mapping tool as updated ACS datasets become available. Therefore, potential applicants should check the relevant PSP and DAC mapping tool website prior to submitting a grant application to verify that current information is being used.

The applicant may use ACS data at the census place, census tract, or census block group geography levels to show whether a project serves a DAC, based on what geography is the most representative for that community. For DACs, the allowable alternative geographies are, respectively:

<table>
<thead>
<tr>
<th>Alternative Geography</th>
<th>DAC</th>
</tr>
</thead>
<tbody>
<tr>
<td>The project serves an area that is contained within a census place for which the MHI is less than 80% of the statewide MHI*</td>
<td></td>
</tr>
<tr>
<td>The project serves an area that is contained within one or more census tracts and the MHI of each census tract is less than</td>
<td></td>
</tr>
<tr>
<td>The project serves an area that is inscribed within one or more census block groups and the MHI of each block group is less than</td>
<td></td>
</tr>
<tr>
<td>The project serves an area that is inscribed in one or more census tracts or block groups and some (but not all) of the census tracts or block groups have an MHI of less than</td>
<td></td>
</tr>
</tbody>
</table>

If a project serves a DAC and is divided among several contiguous census tracts or block groups, and some of the project area tracts or block groups do not meet the DAC criterion, the project will be considered a DAC project for the purpose of waiving local cost share requirements based on proportionality. For some projects, it may be more appropriate to use the proportion of the population served, the project cost, or geographic area served as the basis for proportioning the project into DAC/non-DAC segments.

In cases where the most current ACS 5-year survey data do not support a community as a DAC, DWR will consider use of other data that show the community is a DAC. For example, income survey data may be used to support the MHI of the project benefit area, or a previous ACS 5-year survey data set may be used with sufficient justification. In these instances, please contact DWR at the phone number or email listed in the Foreword for assistance on how alternate data may be used to determine whether a community is a DAC.

* See relevant PSP for most current DAC MHI requirements.
**APPENDIX F – ECONOMICALLY DISTRESSED AREA**

Proposition 1 includes a definition for an EDA. The EDA definition attempts to capture disadvantaged communities that have a state median household income between 80 and 85 percent of the statewide annual MHI. While EDA definition is similar to the DAC definition in utilizing state MHI as a determining factor, the EDA definition also includes other factors such as financial hardship, unemployment and population density.

DWR developed the Economically Distressed Area Instructions and Mapping Tool to assist potential applicants in determining whether the project is located in or benefits an EDA. The Instructions provide guidance on defining the relevant terms contained in the EDA definition and the current comprehensive data available for evaluating those terms; the Mapping Tool provides a user-friendly means to assess whether the area in question is an EDA.

The EDA Mapping Tool presents the different levels of geography, which include counties, census places (incorporated cities and unincorporated towns), census tracts, and census block groups and can be found at the following link: [https://gis.water.ca.gov/app/edas/](https://gis.water.ca.gov/app/edas/)

The applicant may use data at the different geography levels to show whether a project serves an EDA, based on what geography is the most representative for the project location/benefit area. GIS files representing the data and EDA status for the provided geographies are also provided at the above-referenced link.

In cases where the outlined data do not adequately portray the project benefit area (such as when the census geography and the project area do not match), DWR will consider use of other data that demonstrates EDA status. For example, income survey data may be used to support the MHI of the project benefit area. In these instances, please contact DWR at the phone number or email listed in the Forward on how alternate data may be used to demonstrate whether a project benefit area is an EDA.
**APPENDIX G – ADVANCED PAYMENT**

Water Code §10551 authorizes advanced payment by DWR to eligible entities (Grantees and/or Local Project Sponsors) for eligible projects. The following outlines the general requirements for advanced payment eligibility, application process, accountability reporting, and default provisions. Additional detail regarding the specific requirements for advanced payment will be provided in individual grant agreements.

**ELIGIBLE ENTITIES**

Eligible entities are as follows:

- Nonprofit organizations (as defined in Appendix B)
- Disadvantaged communities (as defined in Appendix B)
- Proponents of projects that benefit a DAC (Only the portion of the project that benefits a DAC may be eligible for advanced payment.)

**ELIGIBLE PROJECTS**

To be eligible for advanced payment, projects must be included in their IRWM region’s adopted IRWM Plan and awarded less than $1,000,000 in IRWM grant funds. Fifty (50) percent of the grant award may be advanced; the remaining 50 percent of the grant award will be reimbursed in arrears.

**PROCESS TO APPLY FOR ADVANCED PAYMENT**

Within 90 calendar days of execution of a grant agreement with DWR, the Grantee shall provide DWR with the list of projects for which advanced payment is requested. Failure to provide this list within 90 calendar days of execution of the grant agreement shall result in the forfeiture of the right to request or receive advanced payment for the grant. The list of projects shall include the following:

- Descriptive information concerning each project, consistent with the executed grant agreement
- The names of the entities that will receive the funding for each project, including, but not limited to, an identification as to whether the project proponent or proponents are nonprofit organizations or a DAC, or whether the project benefits a DAC
- Budget for each project
- Anticipated schedule for each project, showing how the advanced funds will be expended within eighteen (18) months of date of receipt
- An update on project status and any reimbursable funds expended to date
- Description of project proponent’s financial capacity to administer the Advanced Payment funds and complete the project once the advanced funds have been expended
- Any other information that DWR may deem necessary

Within 60 days of receiving all required project information and that information being deemed adequate at the sole discretion of DWR, DWR will authorize payment of 50 percent of the grant award for the qualified project(s), or lesser amount as may be requested by Grantee.

The Grantee will be responsible for the timely distribution of the advanced funds to the individual Local Project Sponsors.

**ACCOUNTABILITY REPORT REQUIREMENTS**

Upon receipt of advanced payment, there are requirements and responsibilities that must be met by the Grantee. As required in Water Code §10551(c)(3), the Grantee shall, on a quarterly basis, provide an Accountability Report to DWR regarding the expenditure and use of the advanced grant funds that provides, at a minimum, the following information:

- An itemization as to how advanced payment funds have been expended, including documentation that advanced funds were spent on eligible reimbursable costs
- An updated funding plan with project itemization as to how any remaining advanced payment funds will be expended within eighteen (18) months of date of receipt
• Documentation that the funds were placed/remain in a non-interest-bearing account, and the dates of withdrawals of funds from that account during the reporting period
• Proof of distribution of advanced funds to Local Project Sponsor(s), if applicable

DEFAULT OF ADVANCED PAYMENT OBLIGATIONS
Any of the following actions will be considered a default on the advanced payment obligations and shall result in DWR requesting the Grantee to return all or a portion of the advanced funds and may result in a breach of the grant agreement:

• Failure to expend the advanced funds within eighteen (18) months of receipt unless an extension has been granted by DWR
• Failure by Grantee to submit complete and accurate quarterly Accountability Reports by the required due dates, unless otherwise approved by DWR
• Failure to deposit funds in a noninterest-bearing account
• Use of Advance Payment funds for ineligible expenses and/or activities not consistent with the grant agreement
• Inappropriate use of funds, as deemed by DWR
• Failure to comply with any other term of the executed grant agreement

Notwithstanding Water Code §10551(c)(4), if advanced funds are not fully expended by project completion or by the grant agreement termination date, whichever is earlier, the unused grant funds shall be returned to DWR within 60 calendar days.
