Subject: San Gorgonio IRWM Plan Draft Review

Dear Mr. Vela:

Attached please find the Department of Water Resources (DWR) Draft Review of the San Gorgonio Integrated Regional Water Management (IRWM) Plan. DWR has determined that your IRWM Plan is consistent with the IRWM Planning Act and the related IRWM Plan Standards contained in the 2016 IRWM Grant Program Guidelines.

Pursuant to Volume 2, Section IV of the Guidelines the public comment period for this review will begin on December 30, 2018. The Draft Review will be available for public comments for 30 calendar days on the following website: <https://www.water.ca.gov/Work-With-Us/Grants-And-Loans/IRWM-Grant-Programs/Plan-Review-Process>.

After the public comment period ends, the link to the draft review will become inactive on the website. DWR will consider the comments and work with you on any follow up action before finalizing the review and posting on our website.

If you have any questions, please contact Ted Daum at (916) 651-9264 or Theodore.Daum@water.ca.gov.

Sincerely,

IRWM PLAN REVIEW FORM

INTRODUCTION

IRWM planning regions must have an IRWM Plan that has been reviewed and deemed consistent with the IRWM Plan Standards by DWR for eligibility to receiving Proposition 1 IRWM Implementation Grant funding. DWR will use this IRWM Plan Standards Review Form, which can be found at the link in Volume 1, Appendix A of the 2016 Guidelines and represented in Table 7 of the Guidelines, to ensure a consistent assessment of whether the 2016 IRWM Guidelines are being addressed in the IRWM Plan. The form contains a checklist for each of the 16 Plan Standards and narrative evaluations where required. The evaluation is pass/fail; there is no numeric scoring. Each Plan Standard is either sufficient or not, based on its associated requirements. Each Standard consists of between one and fifteen requirements. A Yes or No is automatically calculated in each Plan Standard header based on the individual requirement evaluations. In general, a passing score of "C" (i.e. 70% of the requirements for a given Plan Standard) is required for a Standard to pass. Standards with only one or 2 requirements will need one or both of those requirements to pass. Standards with 3 requirements will need at least 2 of the requirements to pass. Standards with 4 or 5 requirements will need at least 3 to pass. Some plan elements are legislated requirements. Such plan elements must be met in order to be considered consistent with plan standards. A summary of the sufficiency of each Standard is automatically calculated on the Standards Summary worksheet. A "No" evaluation indicates that a Standard was not met due to insufficient requirements comprising the Standard. The evaluation for each Plan Standard and any associated insufficiencies is summarized on the Standards Summary page. Additional reviewer comments may be added at the bottom of each standards work sheet.

Note: This review form is meant to be a tool used in conjunction with the 2016 IRWM Guidelines document to assist in the evaluation of IRWM plans. It is not designed to be a substitute for the Guidelines document itself. Reviewers must use the Guidelines in determining plan consistency.

DEFINITION OF TABLE HEADINGS

- IRWM Plan Standard:** As named in the 2016 IRWM Guidelines.
- Overall Standard Sufficient:** This field is either "YES" or "NO" and is automatically calculated based on the "Sufficient" column described below. If all fields are "y", the overall standard is deemed sufficient. Any entry other than a "y" in the Sufficient column (i.e. "n", "?", not sure, more detail needed, etc.) results in a NO.
- Plan Standard Requirements Which Must Be Addressed:** **Fields with a footnote () are required by legislation to be included in an IRWM Plan.**

Requirement	Requirements are taken directly from the 2016 IRWM Guidelines.
2016 IRWM Guidelines Source Page(s)	Page(s) in the 2016 IRWM Guidelines which pertain to the Requirement and include the regulatory or other citations where applicable.
Included	Is the Guideline Requirement included in the IRWM Plan? The options are: y = yes, requirement is included in the IRWMP; or n = no, requirement is not included in the IRWMP. If only y or n then presence/absence of the requirement is sufficient for evaluation. If there is a "q" (qualitative) then add a brief narrative, similar to a Grant Application Review public evaluation or supporting information.
Evidence of Plan Sufficiency	
Location of Standard in Grantee IRWM Plan	The page(s) or sections in the IRWM Plan where information on the Requirement can be found. This can be specific paragraphs or entire chapters for more general requirements.
Brief Qualitative Evaluation Narrative	Supporting information for the Requirement if a "q" is in the Included column. This can be just a few sentences or a paragraph and can be taken directly from the IRWM Plan. Comments or supporting information may be entered regardless of whether required.
Sufficient	Is the Guidelines requirement sufficiently represented in the IRWM Plan (y/n).

A description of how the chosen form of governance addresses and insures:						
Public outreach and involvement processes	37	y/n/q	y	1.5, 1.5.4	Any member of the public can be included in the IRWM distribution list to receive notifications and agendas for upcoming Stakeholder Advisory Committee (SAC) meetings, requests for information or input on IRWM planning activities, notifications for funding opportunities, and other IRWM-related announcements. Distribution of information is primarily conducted via email and through the program's website.	y
Effective decision making	37	y/n/q	y	1.4, 1.4.3	The Regional Water Management Group (RWMG) is a decision-making body that seeks to gain consensus from all members on key decision points so that items requiring decisions are discussed and agreed upon. The RWMG determines how to solicit and use input received from the SAC and the public within the IRWM program.	y
Balanced access and opportunity for participation in the IRWM process	37	y/n/q	y	1.5	The 2018 IRWM Plan development was informed by participation from a group of stakeholders that included the Region's water management agencies, tribes, and non-governmental organizations, engaged to represent a balance in viewpoints.	y
Effective communication – both internal and external to the IRWM region	37	y/n/q	y	1.6, 1.7	The San Geronio IRWM stakeholder outreach and involvement process allows for interactive feedback to occur between local planning efforts (both water and land use) and IRWM planning.	y
Long term implementation of the IRWM Plan	37	y/n/q	y	1.1.5, 1.7.1	Future updates to the IRWM Plan will build on the existing IRWM Program governance, outreach, and coordination described in this chapter, in order to meet future DWR requirements, as well as the needs of the Region. Formal IRWM Plan updates are required no less than every five years. The San Geronio IRWM Plan is intended to be a "living document" that is updated on a regular basis.	y

Coordination with neighboring IRWM efforts and State and federal agencies	37	y/n/q	y	1.6, 1.7	Some members of San Gorgonio IRWM RWMG and SAC also participate in other IRWM Regions, which enhances the Region's ability to coordinate with proximate IRWM Regions. Additionally, State and Federal agencies provided input and participation with IRWM efforts to assist in communication, cooperation, or implementation of Plan components.	y
The collaborative process(es) used to establish plan objectives	38	y/n/q	y	1.4.4, 1.5, 1.7, 3.1	The existence of the SAC encourages other stakeholders and members of the public to participate in the planning process and submit goals, priorities, and projects. The 2018 IRWM Plan development was informed by participation from a group of stakeholders that included the Region's water management agencies, tribes, and non-governmental organizations, engaged to represent a balance in viewpoints. The goals and objectives for the San Gorgonio IRWM Plan were developed by the RWMG with input and participation from the Region's stakeholders over the course of several SAC workshops during the development of this IRWM Plan.	y
How interim changes and formal changes to the IRWM Plan will be performed	38	y/n/q	y	1.7.1	Formal IRWM Plan updates are required no less than every five years. The San Gorgonio IRWM Plan is intended to be a "living document" that is updated on a regular basis.	y
Updating or amending the IRWM Plan	38	y/n/q	y	1.7.1	Amendments and changes to the Plan may or may not trigger formal IRWM Plan updates. Amendments and changes significant enough to initiate a formal IRWM Plan update will be determined by the RWMG.	y

Identify quantitative or qualitative metrics and measurable objectives: Objectives must be measurable - there must be some metric the IRWM region can use to determine if the objective is being met as the IRWM Plan is implemented. Neither quantitative nor qualitative metrics are considered inherently better (2) .	49	y/n/q	3.3	y	Section 3.3- A measurable objective means there is a metric the RWMG can use to determine if the objective is being met as the IRWM Plan is implemented. Many of the metrics directly apply to the results of projects that are implemented to support IRWM Plan objectives. They use performance measures to determine if the objective is being met.	y
Explain how objectives are prioritized or reason why the objectives are not prioritized	50	y/n/q	3.4	y	Section 3.4- The SAC was asked to provide a recommendation to the RWMG for prioritizing the objectives in accordance with DWR Plan guidance. Based on the feedback from SAC members, the RWMG decided that all objectives are at the same priority level for the Region.	y

Upon development of the stormwater resource plan, the RWMG shall incorporate it into IRWM plan. The IRWM Plan should discuss the processes that it will use to incorporate such plans." Minor wording differences - e.g. Groundwater Sustainability Plan example in the 2016 Guidelines instead of Groundwater Management Plan in the 2012 Guidelines.	63 - 64	y/n	y	1.7, 2.5.3, 2.6.3, 2.7	No Stormwater Resources Plan was included or referred to, although regional stormwater issues are discussed in Sections 2.5.3, 2.6.3, and 2.7. If stormwater and dry weather capture projects are to receive Proposition 1 IRWM grant funding the requirements of Senate Bill (SB) 985 (i.e. Water Code § 10562 (b)(7)) must be addressed.	N/A
