Disclaimer: The Recommended Award and Total Project Cost are conditional until final terms and conditions are agreed upon and an agreement has been executed. The awarded grant amount listed in the executed agreement can be less than the Recommended Award amount listed here based upon final negotiations between the Awardee and DWR. DWR staff may determine certain tasks are not eligible or do not meet the requirements outlined in the 2019 SGM Grant Program Guidelines and 2019 SGM Grant Program Planning-Round 3 PSP and are subject to change.

- A - Applicant requested more grant funds than they were eligible. The Recommended Award is less than the Requested Amount due to an adjustment based upon previous Round 2 award for GSP development and the maximum award available as instructed in the PSP.
- B - Two applications applied for funds in the same basin and were combined to maintain Round 3 eligibility.
- C - Priority funding given to new applicants who have not received previous Round 2 funds.
- D - Application was not sent to the program team for review due to a glitch in DWR's server. Application was reviewed and determined that the applicant should have received full funding requested based upon the score received.
- E - Based upon a comment letter received, the program team re-evaluated the technical review as requested and determined the original score was lower than warranted based upon the scoring criteria. The recommended funding was increased as a result of the review.
- F - Recommended Award reduced based upon application score and funding available.
- G - The Prop 1 funds, subject to future appropriation, are the remaining funds from Round 1 and Round 2. However, these funds are not available until Fiscal Year 2021/2022. These funds, once available, will be amended into the agreement for the Awardees to access.
- H - Ojai Basin Groundwater Management Authority declined the funding after the Award Notification Letter was submitted. The grant funds were then provided to the Madera Subbasin after approval was provided in June 2020.
- I - Critically Overdrafted Basins
