

# Delta Conveyance Project

Modernizing California's Water Infrastructure | 2024

## MISSED OPPORTUNITY

If the Delta Conveyance Project was operational during the high rain events of winter 2021-2022, January 2023 and January 1 through May 2, 2024, a significant amount of water could have been captured and moved.

	Winter 2021-2022	January 2023	January 1–May 2, 2024
Amount of water that could have been captured: 	<b>236,000</b> acre-feet	<b>228,000</b> acre-feet	<b>921,000</b> acre-feet
That's enough water to supply:	 Over <b>2.5 million</b> people for one year	Over <b>2.3 million</b> people for one year	Over <b>9.6 million</b> people for one year
	OR  Nearly <b>850,000</b> households for one year	Nearly <b>800,000</b> households for one year	Over <b>3.2 Million</b> households for one year
Percent of the total volume of water exported by the SWP per year	<b>45%</b> water year 2021	<b>40%</b> water year 2022	<b>101%</b> 2024 exports
